UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-K

X ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 201 5

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____to _____

Commission File Number: 000-17272

BIO-TECHNE CORPORATION

(Exact name of Registrant as specified in its charter)

Minnesota	**41-1427402**
(State of Incorporation)	(IRS Employer Identification No.)
614 McKinley Place N.E., Minneapolis, MN	**55413-2610**
(Address of principal executive offices)	(Zip Code)

Registrant's telephone number: **(612) 379-8854**

Securities registered pursuant to Section 12(b) of the Act: Common Stock, $0.01 par value
Name of each exchange on which registered: The Nasdaq Stock Market LLC
(Nasdaq Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes (X) No ( )

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ( ) No (X)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes (X) No ( )

Indicate by check mark whether the registrants has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes (X) No ( )

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ( )

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.
Large accelerated filer (X) Accelerated filer ( ) Non-accelerated filer ( ) Small reporting company ( )

Indicate by check mark whether the Registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes ( ) No (X)

The aggregate market value of the Common Stock held by non-affiliates of the Registrant, based upon the closing sale price on December 31, 2014 as reported on The Nasdaq Stock Market ($92.40 per share) was approximately $3.4 billion. Shares of Common Stock held by each officer and director and by each person who owns 5% or more of the outstanding Common Stock have been excluded.

Shares of $0.01 par value Common Stock outstanding at August 26, 2015: 37,167,171

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Company's Proxy Statement for its 2015 Annual Meeting of Shareholders are incorporated by reference into Part III.

TABLE OF CONTENTS

PART I

ITEM 1. BUSINESS

OVERVIEW

Bio-Techne and its subsidiaries, collectively doing business as Bio-Techne (Bio-Techne, we, our, us or the Company) develop, manufacture and sell biotechnology reagents, instruments and clinical diagnostic products worldwide. With our deep product portfolio and application expertise, Bio-Techne is a leader in providing specialized proteins, including cytokines and growth factors, antibodies, related immunoassays, biologically active small molecules and other reagents to the research, diagnostics and clinical controls markets. With recent acquisitions, we also support our customers with instrumentation designed to simplify key protein analysis processes.

A Minneapolis, Minnesota-based company, Bio-Techne originally was founded as Research and Diagnostic Systems, Inc. (R&D Systems) in 1976. Techne Corporation, a public entity at the time, acquired R&D Systems in 1985 and through this action made R&D Systems a public company. The initial products focused on the hematology blood controls and calibrators market but soon expanded through the creation of the Biotechnology Division to include reagents used in life science research. We further expanded the product portfolio through a series of acquisitions, including, the Amgen Inc. research business in 1991, the Genzyme Corporation research business in 1998, Fortron Bio Science, Inc. and BiosPacific, Inc. (BiosPacific) in 2005, and Boston Biochem, Inc. and Tocris Holdings Limited (Tocris) in 2011. In fiscal 2014, we strengthened our Clinical Controls solutions by acquiring Bionostics Holdings Limited (Bionostics). We also increased our Biotechnology segment offerings through the acquisition of Shanghai-based PrimeGene Bio-Tech Co. (PrimeGene) and Novus Biologicals LLC (Novus Biologicals) in 2014. Also in 2014, we acquired ProteinSimple and CyVek, Inc., both with innovative instrument platforms useful for protein analysis, and which together form our new Protein Platforms segment. Following the 2015 fiscal year, in July 2015, we acquired Cliniqa Corporation, which specializes in the manufacturing and commercialization of quality controls and calibrators as well as bulk reagents used in the clinical diagnostic market to further expand and complement our Clinical Controls solutions. With these recent investments, we are able to scale our business and expand our product portfilio as well as geographic markets.

Recognizing the importance of a unified and global approach to meeting our mission and accomplishing our strategies, in fiscal 2014 we implemented a new global brand, Bio-Techne. In November 2014 we also changed the name of the parent corporation from Techne Corporation to Bio-Techne Corporation. The Bio-Techne name is derived from the Greek words “Bio,” or “life,” and “Techne,” or “the application of knowledge to practical matters.” The combination of these words and their meanings capture the essence of Bio-Techne, its products and mission. The Bio-Techne name solidifies the new strategic direction for the Company, and also unifies all of our brands under one complete portfolio.

We operate globally, with offices in multiple locations in the United States, Europe and China. Today, our product line extends to over 275,000 products with state of the art facilities to accommodate many of our manufacturing needs.

We are committed to providing the life sciences community with innovative, high-quality scientific tools to better understand biological processes and drive discovery. We intend to build on Bio-Techne’s past accomplishments, high quality reputation and sound financial position by executing strategies that position us to become the standard for biological content in the research market, and to leverage that leadership position to enter the diagnostics and other adjacent markets. Our strategies include:

Continued innovation in core products. Through collaborations with key opinion leaders and participation in scientific discussions and associations, we expect to leverage our continued significant investment in our research and development activities to be first-to-market with quality products that are at the leading edge of life science researchers’ needs.

Investments in targeted acquisitions. We intend to leverage our strong balance sheet to gain access to new technologies and products that improve our competitiveness in the current market, meet customers’ expanding work flow needs and allow us to enter adjacent markets.

Expansion of geographic footprint. We will continue to expand our sales staff and distribution channels globally in order to increase our global presence and make it easier for customers to transact with us.

Realignment of resources. In recognition of the increased size and scale of the organization, we intend to redesign our development and operational resources to create greater efficiencies throughout the organization.

Talent recruitment and retention. We will recruit, train and retain the most talented staff to implement all of our strategies effectively.

OUR PRODUCTS AND MARKETS

Currently Bio-Techne operates worldwide and has three reportable business segments, the Biotechnology, Clinical Controls and Protein Platforms divisions. The Biotechnology reporting segment develops, manufactures and sells biotechnology research and diagnostic products world-wide. The Clinical Controls reporting segment develops and manufactures controls and calibrators for the global clinical market. And the Protein Platforms reporting segment develops and commercializes proprietary systems and consumables for protein analysis. In fiscal 2015, net sales from Bio-Techne's Biotechnology, Clinical Controls and Protein Platforms segments represented 72.1%, 13.3% and 14.6% of consolidated net sales, respectively. Financial information relating to Bio-Techne's segments is incorporated herein by reference to Note L to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K.

Biotechnology Segment

Through our Biotechnology segment, we are one of the world's leading suppliers of specialized proteins, such as cytokines, growth factors, immunoassays, antibodies and related reagents, to the biotechnology research community. We isolate and produce proteins in a pure form either from the native cells or through recombinant DNA technology. With the acquisition of Tocris in April 2011, we added chemically-based products to our Biotechnology segment. Our combined chemical and biological reagents portfolio provides new tools which customers can use in solving the complexity of important biological pathways and glean knowledge which may lead to a fuller understanding of biological processes and ultimately to the development of novel strategies to address different pathologies.

Biotechnology Segment Products

Proteins. We develop and manufacture in-house a range of cytokines, growth factors and enzymes, extracted from natural sources or produced using recombinant DNA technology. We produce and characterize all protein products to a high degree of purity and biological activity. The growing interest by academic and commercial researchers in cytokines is largely due to the profound effect that tiny amounts of a cytokine can have on cell's and tissues. Cytokines are intercellular messengers and, as a result, act as signaling agents by interacting with specific receptors on the affected cells and trigger events that can lead to significant changes in a cell behavior. Enzymes are proteins which act as biological catalysts that accelerate chemical reactions. Most enzymes, including proteases, kinases and phosphatases, are proteins that modify the structure and function of other proteins and in turn affect cell behavior and function. Additionally, both enzymes and cytokines have the potential to serve as predictive biomarkers and therapeutic targets for a variety of diseases and conditions including cancer, Alzheimer's, arthritis, autoimmunity, diabetes, hypertension, obesity, inflammation, AIDS and influenza.

Antibodies. Antibodies are specialized proteins produced by the immune system of an animal that recognize and bind to target molecules. We produce our polyclonal antibodies in animals (primarily goats, sheep and rabbits), purifying them from the animals' blood. We derive monoclonal antibodies from immortalized rodent cell lines using hybridoma technology, isolating them from cell culture medium, or we manufacture them through recombinant DNA technology. The flow cytometry product line includes fluorochrome labeled antibodies and kits that are used to determine the immuno-phenotypic properties of cells from different tissues.

Immunoassays. We market a variety of immunoassays on different testing platforms, including microtiter-plate based kits sold under the trade name Quantikine®, multiplex immunoassays based on encoded bead technology and immunoassays based on planar spotted surfaces. Researchers use these immunoassay products to quantify the level of a specific protein in biological fluids, such as serum, plasma, or urine. Protein quantification is an integral component of basic research, as potential diagnostic tools for various diseases and as a valuable indicator of the effects of new therapeutic compounds in the drug discovery process. Immunoassays can also be useful in clinical diagnostics. We have received Food and Drug Administration (FDA) marketing clearance for erythropoietin (EPO), transferrin receptor (TfR) and Beta2-microglobulin (b2M) immunoassays for use as *in vitro* diagnostic devices.

Small Molecule Chemically-based Products. These products include small natural or synthetic chemical compounds used by investigators as agonists, antagonists and/or inhibitors of various biological functions. Used in concert with other Company products, they provide additional tools to elucidate key pathways of cellular functions and can provide insight into the drug discovery process.

Biotechnology Segment Customers and Distribution Methods

We sell our biotechnology products directly to customers who are primarily located in North America, western Europe and China. We have a sales and marketing partnership agreement with Fisher Scientific in order to bolster our market presence in North America and leverage the transactional efficiencies offered by the large Fisher organization. We also sell through third party distributors in China, Japan, southern Europe and the rest of the world. Our sales are widely distributed, and no single end-user customer accounted for more than 10% of Biotechnology's net sales during fiscal 2015, 2014 or 2013.

Biotechnology Segment Competitors

A number of companies supply the worldwide market for protein related and chemically-based research reagents, including GE Healthcare Life Sciences, BD Biosciences, Merck KGaA/EMD Chemicals, Inc., PeproTech, Inc., Santa Cruz Biotechnology, Inc., Abcam plc., Thermo Fisher Scientific, Inc., Cayman Chemical Company and Enzo Biochem, Inc. Market success is primarily dependent upon product quality, selection and reputation. We believe we are one of the leading world-wide suppliers of cytokine related products in the research market. We further believe that the expanding line of our products, their recognized quality, and the growing demand for protein related and chemically-based research reagents will allow us to remain competitive in the growing biotechnology research and diagnostic market.

Biotechnology Segment Manufacturing

We develop and manufacture the majority of our cytokines using recombinant DNA technology, thus significantly reducing our reliance on outside resources. Tocris chemical-based products are synthesized from widely available products. We typically have several outside sources for all critical raw materials necessary for the manufacture of our products.

The majority of our Biotechnology products are shipped within one day of receipt of the customers' orders. Consequently, we had no significant backlog of orders for our Biotechnology segment products as of the date of this Annual Report on Form 10-K or as of a comparable date for fiscal 2014.

Clinical Controls Segment

Proper diagnosis of many illnesses requires a thorough and accurate analysis of a patient's blood cells, which is usually done with automated or semi-automated hematology instruments. Our Clinical Controls segment develops and manufactures controls and calibrators for instruments in the global clinical market.

Clinical Controls Segment Products

We derive our hematology controls and calibrators from various cellular components of blood which have been stabilized. These control and calibrator products ensure that hematology instruments are performing accurately and reliably.

We offer a wide range of hematology controls and calibrators for both impedance and laser type cell counters. We also supply hematology control products for use as proficiency testing tools by laboratory certifying authorities in a number of states and countries. We believe our products have improved stability and versatility and a longer shelf life than most of those of our competitors. We also offer clinical controls for blood glucose and blood gas devices, as well as coagulation device control products.

Clinical Controls Segment Customers and Distribution Methods

Original Equipment Manufacturer (OEM) agreements represent the largest market for our clinical controls products. In fiscal 2015, 2014 and 2013, OEM agreements accounted for $41.1 million, $41.2 million, and $10.8 million, respectively, or 9%, 12%, and 3% of total consolidated net sales in each fiscal year, respectively. The increase in fiscal 2014 was a result of the acquisition of Bionostics. We sell our clinical control products directly to customers in the United States and primarily through distributors in the rest of the world. One OEM customer accounted for approximately 13% and 14% of Clinical Controls' net sales during fiscal 2015 and 2014, respectively. No single customer accounted for more than 10% of Clinical Controls' net sales in fiscal 2013.

Clinical Controls Segment Competitors

Competition is intense in the clinical controls business. The market is composed of manufacturers of laboratory reagents, chemicals and coagulation products and independent blood control manufacturers in addition to instrument manufacturers. The principal clinical diagnostic control competitors for our products in this segment are Abbott Diagnostics, Beckman Coulter, Inc., Bio-Rad Laboratories, Inc., Streck, Inc., Siemens Healthcare Diagnostics Inc. and Sysmex Corporation. We believe we are the third largest supplier of hematology controls in the marketplace behind Beckman Coulter, Inc. and Streck, Inc. We compete based primarily on product performance, quality, and price.

Clinical Controls Segment Manufacturing

The primary raw material for our clinical controls products is whole blood. We purchase human blood from commercial blood banks, and porcine and bovine blood from nearby meat processing plants. After we receive raw blood, we separate it into its cellular components, and then process and stabilize it. Although the cost of human blood has increased due to the requirement that it be tested for certain diseases and pathogens prior to use, the higher cost of these materials has not had a material adverse effect on our business. Bio-Techne does not perform its own pathogen testing, as most suppliers test all human blood collected.

The majority of the Clinical Control products are shipped based on a preset, recurring schedule. There was no significant backlog of orders for our Clinical Control products as of the date of this Annual Report on Form 10-K or as of a comparable date for fiscal 2014.

Protein Platforms Segment

Proteins are important for understanding disease because they are the functional units that carry out specific tasks in every cell. Without them, the cell cannot perform its intended function, produce the energy it requires, maintain its shape or survive in its environment. However, proteins are difficult to interrogate because they are large, complex and unique. Our Protein Platforms segment develops, manufactures and sells tools to make protein analysis simpler, more quantitative and reproduceable.

Protein Platforms Segment Products

The Simple Western Platform. The Western blot, or Western, is one of the most widely-used assay for protein analysis and identification today. Unchanged since its invention in 1979, the Western assay is used by molecular biologists, biochemists and clinicians to determine if a specific protein is present in a sample. This assay is an immunoassay, meaning that it requires a specific antibody in order to correctly identify the protein of interest. The Western blot also shows the researcher the size of the protein identified. Our Simple Western platform is a fully-automated, analytical technique that can identify and quantify a protein of interest in a sample. Like the Western blot, our Simple Western also provides the user with the size of the protein and utilizes antibodies to identify specific proteins in the sample. The Simple Western automates the entire workflow and transforms the Western blot into a gel-free, blot-free assay requiring just 30 minutes of sample prep time. Not only does the Simple Western simplify the workflow, it transforms the Western into a real analytical tool for protein analysis, providing truly quantitative, high quality data. The reproducibility of the assay enables researchers to determine quantitatively how much protein exists in a given sample. As has been demonstrated in numerous experiments conducted by us and our customers, each of our Simple Western products is more sensitive than a traditional Western, meaning that the Simple Western will detect a lower level of target protein in a given sample or allow a researcher to use less sample to run the assay. Multiple proteins can also be assessed in every sample allowing a more holistic view of protein function.

SimplePlex Platform. A common assay used in research and clinical diagnostics is the ELISA, or enzyme-linked immunosorbent assay. ELISA tests detect a variety proteins, including cytokines, hormones, bacterial antigens, and antibodies. ELISA tests can be cumbersome and time-consuming, and are not always easy to replicate, especially when attempting to test several proteins in a single assay. The SimplePlex platform is a transformative immunoassay technology which integrates an innovatively designed microfluidic cartridge with a state-of-the-art analyzer to deliver a bench-top immunoassay system that is more sensitive than ELISA with none of the traditional challenges of assay design or repeatability. SimplePlex assays are fully automated, multi-analyte immunoassays that permit the customer to run multiple samples while interrogating multiple analytes in approximately one hour. We believe the SimplePlex technology, along with other immunoassay platforms offered by Bio-Techne, represents the most comprehensive line of immunoassay products to meet customers' complete workflow in their research and clinical protein applications.

Biologics Instrumentation. Biologics are complex protein-based therapeutics, and are transforming the pharmaceutical industry and treatment of many diseases. Biologic drugs are very effective targeted therapeutics for diseases such as arthritis, cancer and diabetes, and their number in development is increasing because of a variety of advances in biochemistry, immunology and biotechnology. Biologics can be monoclonal antibodies, recombinant proteins and vaccines. Developers of biologics are required by regulatory agencies, such as FDA, to develop robust processes to ensure that the specific biologic of interest can be identified and characterized accurately and then consistently and reliably produced. As a result, a suite of complementary analytical approaches are utilized to measure attributes such as identity, biological potency, purity, safety and impurities. These analytical approaches are used throughout the product development process, spanning initial discovery, expression, formulation, process development, quality control and final release. Our Biologics tools help researchers interrogate protein purity and identify contaminants during the development and production of biologics. Our iCE3 system is an analytical tool that measures the charge heterogeneity of proteins. Our micro-flow imaging, or MFI, platform detects both visible (10 μm and larger) and subvisible (below 10 μm) particles. It directly measures the size, shape, count and concentration of particles within the 1 μm to 300 μm size range.

Protein Platforms Segment Customers and Distribution Methods.

We sell our protein platforms products directly to customers who are primarily located in North America, western Europe and Japan. We also sell through third party distributors in China, southern Europe and the rest of the world. Our sales are widely distributed, and no single end-user customer accounted for more than 10% of Protein Platforms' net sales during fiscal 2015, 2014 or 2013.

Protein Platforms Segment Competitors.

Our Simple Western platform is a complete replacement for the traditional Western blot. As a result, we face competition from the vendors that supply instruments and reagents to traditional Western blot users. These competitors include Bio-Rad Laboratories, GE Healthcare, Merck KGaA, PerkinElmer and Thermo Fisher Scientific. All of these vendors provide elements of the traditional work flow. Similarly, our SimplePlex platform replaces the traditional ELISA assay as well as some flow-based multiplex assays; competitors include those who supply instruments and reagents for ELISAs, including Meso Scale Discovery, PerkinElmer, Thermo Fisher, Luminex, Millipore, Molecular Devices, Tecan BioTek, and Bio-Rad Laboratories. The primary competitors for our Biologics instrumentation are Agilent Technologies, Danaher and PerkinElmer, as well as GE Healthcare, Shimadzu, Thermo Fisher and Waters. We believe our competitive position is strong due to the unique aspects of our products and our product quality.

Protein Platforms Segment Manufacturing.

We manufacture our Simple Western products at our facility in San Jose, California and Minneapolis, Minnesota. Our Biologics instruments and consumables are manufactured at our facilities in Toronto and Ottawa, both located in Ontario, Canada. We manufacture our Simple Plex products at our facility in Wallingford, Connecticut. We manufacture our own components where we believe it adds significant value, but we rely on suppliers for the manufacture of some of the consumables, components, subassemblies and autosamplers used with, or included in, our systems, which are manufactured to our specifications. We are not dependent on any one supplier and are not required to carry significant amounts of inventory to assure ourselves of a continuous allotment of goods from suppliers. We conduct all final testing and inspection of our products. We have established a quality control program, including a set of standard manufacturing and documentation procedures.

There was no significant backlog of orders for our Protein Platforms products as of the date of this Annual Report on Form 10-K or as of a comparable date for fiscal 2014.

Geographic Information

Following is financial information relating to geographic areas (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
External sales			
United States	$ 245,217	$ 190,359	$ 164,308
Europe	134,077	97,157	88,297
China	26,105	18,878	14,106
Other Asia	23,806	32,704	28,608
Rest of world	23,041	18,665	15,256
Total external sales	$ 452,246	$ 357,763	$ 310,575

	As of June 30,		
	2015	*2014*	*2013*
Long-lived assets			
United States and Canada	$ 119,075	$ 109,790	$ 103,541
Europe	11,239	8,340	7,129
China	1,286	678	117
Total long-lived assets	$ 131,600	$ 118,808	$ 110,787

Net sales are attributed to countries based on the location of the customer or distributor. Long-lived assets are comprised of land, buildings and improvements and equipment, net of accumulated depreciation and other assets. See the description of risks associated with the Company's foreign subsidiaries in Item 1A of this Annual Report on Form 10-K.

PRODUCTS UNDER DEVELOPMENT

Bio-Techne is engaged in ongoing research and development in all of our major product lines: controls and calibrators, protein analysis instrumentation and related reagents, and cytokines, antibodies, assays, small bioactive molecules and related biotechnology products. We believe that our future success depends, to a large extent, on our ability to keep pace with changing technologies and market needs.

In fiscal 2015, Bio-Techne introduced approximately 1,600 new biotechnology products to the life science market. All of these products are for research use only and therefore did not require FDA clearance. We also expect to significantly expand our portfolio of products through acquisitions of existing businesses. However, there is no assurance that any of the products in the research and development phase can be successfully completed or, if completed, can be successfully introduced into the marketplace.

	Year Ended June 30,		
	2015	2014	2013
Research expense (in thousands):			
Biotechnology	$ 28,201	$ 29,189	$ 28,441
Clinical Controls	1,628	1,756	816
Protein Platforms	11,024	0	0
	$ 40,853	$ 30,945	$ 29,257
Percent of net sales	9%	9%	9%

ACQUISITIONS AND INVESTMENTS

Fiscal 2016 Acquisition

On July 8, 2015, Bio-Techne acquired all of the outstanding equity of Cliniqa Corporation (Cliniqa). Cliniqa, based in San Marcos, California, specializes in the manufacturing and commercialization of quality controls and calibrators as well as bulk reagents used in the clinical diagnostic market. Its controls and reagents are used in a wide variety of diagnostic tests for such pathologies as cardiac disease, diabetes, cancer, immunological disorders, therapeutic drug monitoring, urine analysis and toxicology. The acquisition further expanded and complemented our clinical controls product lines.

Fiscal 2015 Acquisitions

On July 31, 2014, Bio-Techne closed on the acquisition of all of the outstanding equity of ProteinSimple for approximately $300 million. The purchase price was adjusted post-closing based on the final levels of cash and working capital of ProteinSimple at closing. Certain ProteinSimple stockholders are subject to non-compete and non-solicitation obligations for three years following the closing. ProteinSimple develops, markets and sells Western-blotting instruments, biologics and reagents. Western blotting remains one of the most frequently practiced life science techniques, and ProteinSimple's tools allow researchers to perform this basic research technique with greater speed and efficiency. Automation of the Western blotting technique has the potential to drive additional sales of the consumables Bio-Techne already sells, especially antibodies which have been validated for Western blotting applications. The ProteinSimple products became the foundation of our ProteinPlatforms segment.

On July 2, 2014, Bio-Techne announced that it had acquired all of the issued and outstanding equity interests of Novus Biologicals, LLC (Novus) for approximately $60.0 million. Novus is a Littleton, Colorado-based supplier of a large portfolio of both outsourced and in-house developed antibodies and other reagents for life science research, delivered through an innovative digital commerce platform. The acquisition further expanded our antibody portfolio, consistent with our long term strategic business plan to serve customers with a complete and quality line of reagents, and became a part of our Biotechnology segment.

Fiscal 2014 Investments and Acquisitions

After investing $10.0 million in CyVek, Inc. on April 1, 2014, Bio-Techne's wholly-owned subsidiary, R & D Systems, Inc. acquired all of CyVek's equity on November 4, 2014 for approximately $60.0 million. Bio-Techne completed the acquisition as a result of CyVek meeting certain pre-agreed commercial milestones. We will pay CyVek stockholders up to an additional $35.0 million based on the revenue generated by CyVek's products and related products before May 4, 2017. We will also pay CyVek's stockholders 50% of the amount, if any, by which the revenue from CyVek's products and related products exceeds $100 million in calendar year 2020. This strategic investment allowed us to offer the SimplePlex platform as part of our Protein Platforms segment, strengthening our market position in the immunoassay market where multiplex testing platforms are becoming more significant.

On April 30, 2014, Bio-Techne's China affiliate, R&D Systems China, acquired PrimeGene for approximately $18.8 million. PrimeGene is a leader in the China market in the development and manufacture of recombinant proteins for research and industrial applications, and has large scale protein manufacturing capabilities to serve the Chinese market as well as global industrial customers. PrimeGene is included in Bio-Techne's Biotechnology segment.

On July 22, 2013, the Company's R&D Systems subsidiary acquired for approximately $103 million cash all of the outstanding shares of Bionostics. Bionostics is a global leader in the development, manufacture and distribution of control solutions that verify the proper operation of *in-vitro* diagnostic devices primarily utilized in point of care blood glucose and blood gas testing. Bionostics is included in Bio-Techne's Clinical Controls segment.

Prior Investments

Bio-Techne has an approximate 14% equity investment in ChemoCentryx, Inc. (CCXI). CCXI is a technology and drug development company working in the area of chemokines. Chemokines are cytokines which regulate the trafficking patterns of leukocytes, the effector cells of the human immune system. Bio-Techne's investment in CCXI is included in "Short-term available-for-sale investments" at June 30, 2015 and 2014 at fair values of $52.3 million and $37.1 million, respectively.

GOVERNMENT REGULATION

All manufacturers of clinical diagnostic controls are regulated under the Federal Food, Drug and Cosmetic Act, as amended. All of Bio-Techne's clinical control products are classified as "*in vitro* diagnostic products" by the U.S. Food and Drug Administration (FDA). The entire control manufacturing process, from receipt of raw materials to the monitoring of control products through their expiration date, is strictly regulated and documented. FDA inspectors make periodic site inspections of Bio-Techne's clinical control operations and facilities. Clinical control manufacturing must comply with Quality System Regulations (QSR) as set forth in the FDA's regulations governing medical devices.

Three of Bio-Techne's immunoassay kits, EPO, TfR and b2M, have FDA clearance to be sold for clinical diagnostic use. Bio-Techne must comply with QSR for the manufacture of these kits. Biotechnology products manufactured in the U.S. and sold for use in the research market do not require FDA clearance. Tocris products are used as research tools and require no regulatory approval for commercialization. However, some of Tocris' products are considered controlled substances and require government permits to stock such products and to ship them to end-users. Bio-Techne has no reason to believe that these annual permits will not be re-issued.

Some of Bio-Techne's research groups use small amounts of radioactive materials in the form of radioisotopes in their product development activities. Thus, Bio-Techne is subject to regulation and inspection by the Minnesota Department of Health and has been granted a license through August 2016. Bio-Techne has had no difficulties in renewing this license in prior years and has no reason to believe it will not be renewed in the future. If, however, the license was not renewed, it would have minimal effect on Bio-Techne's business since there are other technologies the research groups could use to replace the use of radioisotopes.

Bio-Techne is subject to the medical device excise tax which was included as part of the Affordable Care Act. The tax applies to the sale of medical devices by a manufacturer, producer or importer of the device and is 2.3% of the sale price. The tax applies to Bio-Techne's *in vitro* diagnostic products, including its clinical control products and biotechnology clinical diagnostic immunoassay kits. Bio-Techne's medical device excise tax for fiscal 2015 and 2014 was $0.6 million and $0.5 million, respectively.

PATENTS AND TRADEMARKS

Our success depends at least in part upon our ability to protect our core technologies and intellectual property. To accomplish this, we rely on a combination of intellectual property rights, including patents, trade secrets and trademarks, as well as customary contractual protections. As of June 30, 2015, we had rights to 45 granted patents and approximately 50 pending patent applications, primarily relating to our clinical controls products. Paten protection, if granted, generally has a life of 20 years from the date of the patent application or patent grant. We cannot assure you whether any of our pending patent applications will result in the grant of a patent, whether the examination process will require us to narrow our claims, and whether our claims will provide adequate coverage of our competitors' products or services. Bio-Techne is not substantially dependent on products for which it has obtained patent protection.

In addition to pursuing patents on our products, we also preserve much of our innovation as trade secrets. We have taken steps to protect our intellectual property and proprietary technology by entering into confidentiality agreements and intellectual property assignment agreements with our employees, consultants, corporate partners and, when needed, our advisors. Such agreements may not be enforceable or may not provide meaningful protection for our trade secrets or other proprietary information in the event of unauthorized use or disclosure or other breaches of the agreements, and we may not be able to prevent such unauthorized disclosure. Monitoring unauthorized disclosure is difficult, and we do not know whether the steps we have taken to prevent such disclosure are, or will be, adequate.

No assurance can be given that Bio-Techne's products do not infringe upon patents or proprietary rights owned or claimed by others, particularly for genetically engineered products. Bio-Techne has not conducted a patent infringement study for each of its products. Where we have been contacted by patent holders with certain intellectual property rights, Bio-Techne has entered into licensing agreements with patent holders under which it has the exclusive and/or non-exclusive right to use patented technology as well as the right to manufacture and sell certain patented proteins and related products to the research market. For fiscal 2015, 2014 and 2013, total royalties expensed under these licenses were approximately $4.0 million, $3.5 million and $3.3 million, respectively.

Bio-Techne has obtained federal trademark registration for certain of its brand and product names. Bio-Techne believes it has common law trademark rights to certain marks in addition to those which it has registered.

SEASONALITY OF BUSINESS

Biotechnology and Protein Platforms segment products marketed by Bio-Techne historically experience a slowing of sales or of the rate of sales growth during the summer months. Bio-Techne also usually experiences a slowing of sales in all of its reportable segments during the Thanksgiving to New Year holiday period. Bio-Techne believes this seasonality is a result of vacation and academic schedules of its world-wide customer base.

EMPLOYEES

Through its subsidiaries, Bio-Techne employed approximately 1,356 full-time and part-time employees as of June 30, 2015.

ENVIRONMENT

Compliance with federal, state and local environmental protection laws in the United States, United Kingdom, Germany, China and Hong Kong had no material effect on Bio-Techne in fiscal 2015.

INVESTOR INFORMATION

We are subject to the information requirements of the Securities Exchange Act of 1934 (the Exchange Act). Therefore, we file periodic reports, proxy statements, and other information with the Securities and Exchange Commission (SEC). Such reports, proxy statements, and other information may be obtained by visiting the Public Reference Room of the SEC at 100 F Street, N.E., Room 1580, Washington, DC 20549 or by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet site (http://www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically.

Financial and other information about us is available on our web site (http://www.bio-techne.com). We make available on our web site copies of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13 or 15(d) of the Exchange Act as soon as reasonably practicable after filing such material electronically or otherwise furnishing it to the SEC.

EXECUTIVE OFFICERS OF THE REGISTRANT

Currently, the names, ages, positions and periods of service of each executive officer of the Company are as follows:

Name	*Age*	*Position*	*Officer Since*
Charles Kummeth	55	President, Chief Executive Officer and Director	2013
James T. Hippel	44	Chief Financial Officer	2014
Brenda Furlow	57	Senior Vice President, General Counsel and Secretary	2014
J. Fernando Bazan	55	Chief Technology Officer	2013
Marcel Veronneau	61	Senior Vice President, Clinical Controls	1995
David Eansor	54	Senior Vice President, Biotechnology	2014
Robert Gavin	48	Senior Vice President, Protein Platforms	2014

Set forth below is information regarding the business experience of each executive officer. There are no family relationships among any of the officers named, nor is there any arrangement or understanding pursuant to which any person was selected as an officer.

Charles Kummeth has been President and Chief Executive Officer of the Company since April 1, 2013. Prior to joining the Company, he served as President of Mass Spectrometry and Chromatography at Thermo Fisher Scientific Inc. from September 2011. He was President of that company's Laboratory Consumables Division from 2009 to September 2011. Prior to joining Thermo Fisher, Mr. Kummeth served in various roles at 3M Corporation, most recently as the Vice President of the company's Medical Division from 2006 to 2008.

James T. Hippel has been Chief Financial Officer of the Company since April 1, 2014. Prior to joining the Company, Mr. Hippel served as Senior Vice President and Chief Financial Officer for Mirion Technologies, Inc., a $300 million global company that provides radiation detection and identification products. Prior to Mirion, Mr. Hippel served as Vice President, Finance at Thermo Fisher Scientific, Inc., leading finance operations for its Mass Spectrometry & Chromatography division and its Laboratory Consumables division. In addition, Mr. Hippel's experience includes nine years of progressive financial leadership at Honeywell International, within its Aerospace Segment. Mr. Hippel started his career with KPMG LLP and is a CPA (inactive).

Brenda Furlow joined the Company as Senior Vice President and General Counsel on August 4, 2014. Most recently, Ms. Furlow was an associate with Alphatech Counsel, SC and served as general counsel to emerging growth technology companies. Ms. Furlow was General Counsel for TomoTherapy, Inc., a global, publicly traded company that manufactured and sold radiation therapy equipment from 2007 to 2011. From 1998 to 2007, Ms. Furlow served as General Counsel for Promega Corporation, a global life sciences company. In addition, Ms. Furlow's experience includes five years in various positions with a credit union trade association. Ms. Furlow began her legal career as an associate with a Chicago-based law firm.

Dr. J. Fernando Bazan was appointed Chief Technical Officer when he joined the Company on August 1, 2013. Dr. Bazan is an adjunct professor at the University of Minnesota School of Medicine and served as Chief Scientific Officer at Neuroscience, Inc., a neuroimmunology startup from 2010 to 2012. From 2003 through 2010, Dr. Bazan served as Senior Scientist at Genentech, Inc. (Roche).

Marcel Veronneau was appointed as Vice President, Clinical Controls in March 1995. Prior thereto, he served as Director of Operations for R&D Systems' Clinical Controls Division since joining the Company in 1993.

David Eansor has served as Senior Vice President, Biotechnology since April, 2015. Prior to that, Mr. Eansor was Senior Vice President, Novus Biologicals, since the Company completed its acquisition of Novus on July 2, 2014. From January 2013 until the date of the acquisition, Mr. Eansor was the Senior Vice President of Corporate Development of Novus Biologicals. Prior to joining Novus, Mr. Eansor was the President of the Bioscience Division of Thermo Fisher Scientific. Mr. Eansor was promoted to Division President in early 2010 after 5 years as President of Thermo Fisher's Life Science Research business.

Robert Gavin was appointed Senior Vice President of the Protein Platforms Division in December 2014. Mr. Gavin had previously been Vice President of Product Development at ProteinSimple, which was acquired by the Company in July, 2014. Prior to joining ProteinSimple in 2008, Mr. Gavin served as Director of Engineering at MDS Analytical Technologies (previously Molecular Devices, Inc.). Prior to Molecular Devices, Mr. Gavin managed a team of engineers at Affymax Research Institute.

ITEM 1A. RISK FACTORS

Statements in this Annual Report on Form 10-K, and elsewhere, that are forward-looking involve risks and uncertainties which may affect the Company's actual results of operations. Certain of these risks and uncertainties which have affected and, in the future, could affect the Company's actual results are discussed below. The Company undertakes no obligation to update or revise any forward-looking statements made due to new information or future events. Investors are cautioned not to place undue emphasis on these statements.

The following risk factors should be read carefully in connection with evaluation of the Company's business and any forward-looking statements made in this Annual Report on Form 10-K and elsewhere. Any of the following risks or others discussed in this Annual Report on Form 10-K or the Company's other SEC filings could materially adversely affect the Company's business, operating results and financial condition.

Changes in economic conditions could negatively impact the Company's revenues and earnings.

The Company's biotechnology and protein platforms products are sold primarily to research scientists at pharmaceutical and biotechnology companies and at university and government research institutions. Research and development spending by the Company's customers and the availability of government research funding can fluctuate due to changes in available resources, mergers of pharmaceutical and biotechnology companies, spending priorities, general economic conditions and institutional and governmental budgetary policies. The U.S. and global economies recently experienced a period of economic downturn and have been slow to recover. Such downturns, and other reductions or delays in governmental funding, could cause customers to delay or forego purchases of the Company's products. The Company carries essentially no backlog of orders and changes in the level of orders received and filled daily can cause fluctuations in quarterly revenues and earnings.

The biotechnology and clinical control industries are very competitive, more so recently due to consolidation trends.

The Company faces significant competition across all of its product lines and in each market in which it operates. Competitors include companies ranging from start-up companies, which may be able to more quickly respond to customers' needs, to large multinational companies, which may have greater financial, marketing, operational, and research and development resources than the Company. In addition, consolidation trends in the pharmaceutical and biotechnology industries have served to create fewer customer accounts and to concentrate purchasing decisions for some customers, resulting in increased pricing pressure on the Company. Moreover, customers may believe that consolidated businesses are better able to compete as sole source vendors, and therefore prefer to purchase from such businesses. The entry into the market by manufacturers in China and other low-cost manufacturing locations is also creating increased pricing and competitive pressures, particularly in developing markets. Failure to anticipate and respond to competitors' actions may impact the Company's future sales and earnings.

The Company's future growth is dependent on the development of new products in a rapidly changing technological environment.

One element of the Company's growth strategy is to increase revenues through new product releases. As a result, the Company must anticipate industry trends and develop products in advance of customer needs. New product development requires planning, designing and testing at both technological and manufacturing-process levels and may require significant research and development expenditures. There can be no assurance that any products now in development, or that the Company may seek to develop in the future, will achieve feasibility or gain market acceptance. There can also be no assurance that the Company's competitors will not succeed in developing technologies and products in a more timely and cost effective manner than the Company. If the Company does not appropriately innovate and invest in new technologies, the Company's technologies will become outdated, rendering the Company's technologies and products obsolete or noncompetitive. To the extent the company fails to introduce new and innovative products, the Company may lose market share to its competitors, which may be difficult or impossible to regain.

Acquisitions and divestures pose financial, management and other risks and challenges.

The Company routinely explores acquiring other businesses and assets. From time to time, the Company may also consider disposing of certain assets, subsidiaries, or lines of business. During fiscal 2015, the Company acquired Novus, ProteinSimple, and CyVek, In July 2016, we acquired Cliniqa Corporation. Acquisitions or divestitures present financial, managerial and operational challenges, including diversion of management attention, difficulty with integrating acquired businesses, integration of different corporate cultures or separating personnel and financial and other systems, increased expenses, assumption of unknown liabilities, indemnities, and potential disputes with the buyers or sellers, and the need to evaluate the financial systems of and establish internal controls for acquired entities. There can be no assurance that the Company will engage in any additional acquisitions or divestitures or that the Company will be able to do so on terms that will result in any expected benefits. In addition, acquisitions financed with borrowings could make the Company more vulnerable to business downturns and could negatively affect the Company's earnings due to higher leverage and interest expense.

The Company is subject to risk associated with global operations.

The Company engages in business globally, with approximately 46% of the Company's sales revenue in fiscal 2015 coming from outside the U.S. This subjects the Company to a number of risks, including international economic, political, and labor conditions; tax laws (including U.S. taxes on foreign subsidiaries); increased financial accounting and reporting burdens and complexities; unexpected changes in, or impositions of, legislative or regulatory requirements; failure of laws to protect intellectual property rights adequately; inadequate local infrastructure and difficulties in managing and staffing international operations; delays resulting from difficulty in obtaining export licenses for certain technology; tariffs, quotas and other trade barriers and restrictions; transportation delays; operating in locations with a higher incidence of corruption and fraudulent business practices; and other factors beyond the Company's control, including terrorism, war, natural disasters, climate change and diseases.

The application of laws and regulations implicating global transactions is often unclear and may at times conflict. Compliance with these laws and regulations may involve significant costs or require changes in the Company's business practices that result in reduced revenue and profitability. Non-compliance could also result in fines, damages, criminal sanctions, prohibited business conduct, and damage to the Company's reputation. The Company incurs additional legal compliance costs associated with its global operations and could become subject to legal penalties in foreign countries if it does not comply with local laws and regulations, which may be substantially different from those in the U.S.

The Company conducts and plans to grow its business in developing markets, which may cause additional operational and legal risk.

The Company's efforts to grow its businesses depends, to a degree, on its success in developing market share in additional geographic markets including, but not limited to, China. In some cases, these countries have greater political and economic volatility and greater vulnerability to infrastructure and labor disruptions than the Company's other markets. Operating and seeking to expand business in a number of different regions and countries exposes the Company to multiple and potentially conflicting cultural practices, business practices and legal and regulatory requirements.

In many foreign countries, particularly in those with developing economies, it may be common to engage in business practices that are prohibited by U.S. regulations applicable to the Company, such as the Foreign Corrupt Practices Act. Although the Company implements policies and procedures designed to ensure compliance with these laws, there can be no assurance that all of the Company's employees, contractors, and agents, as well as those companies to which the Company outsources certain aspects of its business operations, including those based in foreign countries where practices which violate such U.S. laws may be customary, will comply with the Company's internal policies. Any such non-compliance, even if prohibited by the Company's internal policies, could have an adverse effect on the Company's business and result in significant fines or penalties.

The Company is significantly dependent on sales made through foreign subsidiaries which are subject to changes in exchange rates and changes to the strength of foreign governments and economic conditions.

Approximately 24% of the Company's net sales in fiscal 2015 were made through its foreign subsidiaries, which transact their sales in foreign currencies. Any adverse movement in foreign currency exchange rates could, therefore, negatively affect the Company's revenues and earnings. In fiscal 2015, for example, the exchange rate between the Euro and the US dollar changed materially, resulting in consolidated net sales that were approximately $8.5 million lower in fiscal 2015 when compared to fiscal 2014. Moreover, the financial crisis faced by several Eurozone countries, and the ongoing economic instability in that region, may lead to reduced spending on health care and research by Eurozone governments, which could adversely affect the Company's European sales, as well as its revenues, financial condition and results of operations.

The Company may incur losses as a result of its investments in ChemoCentryx, Inc. and other companies in which it does not have a majority interest, the success of which is largely out of the Company's control.

The Company's expansion strategies include collaborations and investments in joint ventures and companies developing new products related to the Company's business. These strategies carry risks that objectives will not be achieved and future earnings will be adversely affected.

The Company has an approximate 14% equity investment in ChemoCentryx, Inc. (CCXI) that is valued at $52.3 million on the Company's June 30, 2015 Consolidated Balance Sheet. CCXI is a biopharmaceutical company focused on discovering, developing and commercializing orally-administered therapeutics to treat autoimmune diseases, inflammatory diseases and cancers. The development of new drugs is a highly risky undertaking. CCXI is dependent on a limited number of products, must achieve favorable clinical trial results, obtain regulatory and marketing approval for these products. CCXI has also incurred significant losses and has yet to achieve profitability.

The ownership of CCXI shares is very concentrated, the share price is highly volatile and there is limited trading of the shares. These factors make it possible that the Company could experience future dilution or a decline in the $22.8 million unrealized gain it has on its CCXI investment and/or its original $29.5 million investment in CCXI. At August 26, 2015, the market value of the Company's investment in CCXI was approximately $44 million.

The Company's success will be dependent on recruiting and retaining highly qualified personnel.

Recruiting and retaining qualified scientific, production, sales and marketing, and management personnel are critical to the Company's success. The Company's anticipated growth and its expected expansion into areas and activities requiring additional expertise will require the addition of new personnel and the development of additional expertise by existing personnel. The failure to attract and retain such personnel could adversely affect the Company's business.

The Company is dependent on maintaining its intellectual property rights.

The Company's success depends in part on its ability to protect and maintain its intellectual property, including trade secrets. If we fail to protect our intellectual property, third parties may be able to compete more effectively against us, we may lose our technological or competitive advantage, or we may incur substantial litigation costs in our attempts to recover or restrict use of our intellectual property. The Company attempts to protect trade secrets in part through confidentiality agreements, but those agreements can be breached, and if they are, there may not be an adequate remedy. If trade secrets become publicly known, the Company could lose its competitive position.

The Company also attempts to protect and maintain intellectual property through the patent process. As of June 30, 2015, we owned or exclusively licensed 45 granted U.S. patents and approximately 50 pending patent applications. We cannot be confident that any of our currently pending or future patent applications will result in granted patents, and we cannot predict how long it will take for such patents to be granted. It is possible that, if patents are granted to us, others will design around our patented technologies. Further, other parties may challenge any patents granted to us and courts or regulatory agencies may hold our patents to be invalid or unenforceable. We may not be successful in defending challenges made against our patents and patent applications. Any successful third-party challenge to our patents could result in the unenforceability or invalidity of such patents. Our ability to establish or maintain a technological or competitive advantage over our competitors may be diminished because of these uncertainties. To the extent our intellectual property offers inadequate protection, or is found to be invalid or unenforceable, we would be exposed to a greater risk of direct competition. If our intellectual property does not provide adequate coverage of our competitors' products, our competitive position could be adversely affected, as could our business. Both the patent application process and the process of managing patent disputes can be time consuming and expensive.

We may be involved in lawsuits to determine the scope, coverage and validity of others' proprietary rights, or to defend against third-party claims of intellectual property infringement, any of which could be time-intensive and costly and may adversely impact our business.

The Company's success depends in part on its ability to operate without infringing the proprietary rights of others, and to obtain licenses where necessary or appropriate. The Company has obtained and continues to negotiate licenses to produce a number of products claimed to be owned by others. Since the Company has not conducted a patent infringement study for each of its products, it is possible that products of the Company may unintentionally infringe patents of third parties.

The Company has been and may in the future be sued by third parties alleging that the Company is infringing their intellectual property rights. These lawsuits are expensive, take significant time, and divert management's focus from other business concerns. If the Company is found to be infringing the intellectual property of others, it could be required to cease certain activities, alter its products or processes or pay licensing fees. This would cause unexpected costs and delays which may have a material adverse effect on the Company. If the Company is unable to obtain a required license on acceptable terms, or unable to design around any third party patent, it may be unable to sell some of its products and services, which could result in reduced revenue. In addition, if the Company does not prevail, a court may find damages or award other remedies in favor of the opposing party in any of these suits, which may adversely affect the Company's earnings.

The Company has entered into and drawn on a revolving credit facility. The burden of this additional debt could adversely affect the Company, make it more vulnerable to adverse economic or industry conditions, and prevent it from funding its expansion strategy.

In connection with the acquisition of ProteinSimple in July 2014, the Company entered into a revolving credit facility, governed by a Credit Agreement dated July 28, 2014. The Credit Agreement provides for a revolving credit facility of $150 million, which can be increased by an additional $150 million subject to certain conditions. Borrowings under the Credit Agreement bear interest at a variable rate. As of July 31, 2015, the Company had drawn $73 million under the Credit Agreement.

The terms of the Credit Agreement and the burden of the indebtedness incurred thereunder could have negative consequences for us, such as:

- limiting our ability to obtain additional financing to fund our working capital, capital expenditures, debt service requirements, expansion strategy, or other needs;
- increasing the Company's vulnerability to, and reducing its flexibility in planning for, adverse changes in economic, industry and competitive conditions; and
- increasing the Company's vulnerability to increases in interest rates.

The Credit Agreement also contains negative covenants that limit our ability to engage in specified types of transactions. These covenants limit our ability to, among other things, sell, lease or transfer any properties or assets, with certain exceptions; and enter into certain merger, consolidation or other reorganization transactions, with certain exceptions.

A breach of any of these covenants could result in an event of default under our credit facility. Upon the occurrence of an event of default, the lender could elect to declare all amounts outstanding under such facility to be immediately due and payable and terminate all commitments to extend further credit. In addition, the Company would be subject to additional restrictions if an event of default exists under the Credit Agreement, such as a prohibition on the payment of cash dividends.

We may experience difficulties implementing our enterprise resource planning system.

We are implementing a new enterprise resource planning ("ERP") system. Our ERP system is critical to our ability to accurately maintain books and records, record transactions, provide important information to our management and prepare our financial statements. The implementation of the new ERP system requires the investment of significant financial and human resources. In addition, we may not be able to successfully complete the implementation of the new ERP system without experiencing difficulties. Any disruptions, delays or deficiencies in the design and implementation of the new ERP system could adversely affect our ability to process orders, ship products, provide services and customer support, send invoices and track payments, fulfill contractual obligations or otherwise operate our business.

The Company's business is subject to governmental laws and regulations.

The Company's operations are subject to regulation by various US federal, state and international agencies. Laws and regulations enacted and enforced by these agencies impact all aspects of the Company's operations including design, development, manufacturing, labeling, selling and the importing and exporting of products across international borders. Any changes to laws and regulations governing such activities could have an effect on the Company's operations and ability to obtain regulatory clearance or approval of the Company's products. If the Company fails to comply with any of these regulations, it may become subject to fines, penalties or actions that could impact development, manufacturing and distribution and/or increase costs or reduce sales. The approval process applicable to clinical control products and certain immunoassay kits that may be developed by the Company may take a year or more. Delays in obtaining approvals could adversely affect the marketing of new products developed by the Company, and negatively affect the Company's revenues.

As a multinational corporation, the Company is subject to the tax laws and regulations of U.S. federal, state and local governments and of several international jurisdictions. From time to time, new tax legislation may be implemented which could adversely affect current or future tax filings or negatively impact the Company's effective tax rate and thus increase future tax payments.

The Company relies heavily on internal manufacturing and related operations to produce, package and distribute its products.

The Company's internal quality control, packaging and distribution operations support the majority of the Company's sales. Since certain Company products must comply with Food and Drug Administration Quality System Regulations and because in all instances, the Company creates value for its customers through the development of high-quality products, any significant decline in quality or disruption of operations for any reason, particularly at the Minneapolis facility, could adversely affect sales and customer relationships, and therefore adversely affect the business. While the Company has taken certain steps to manage these operational risks, and while insurance coverage may reimburse, in whole or in part, for losses related to such disruptions, the Company's future sales growth and earnings may be adversely affected by perceived disruption risks or actual disruptions.

The design and manufacture of products involves certain inherent risks. Manufacturing or design defects could lead to recalls, litigation or alerts relating to the Company's products. A recall could result in significant costs and damage to the Company's reputation which could reduce demand, particularly for certain of its regulated products.

Disruptions in the supply and cost of raw materials could reduce the Company's earnings, cash flow, and ability to meet customers' needs.

The Company's products are made from a wide variety of raw materials that are generally available from alternate sources of supply. However, some of the Company's products are available only from a single supplier. If such suppliers were to limit or terminate production or otherwise fail to supply these materials for any reason, such failures could have a material adverse impact on the Company's product sales and business. In addition, price increases for raw materials could adversely affect the Company's earnings and cash flow.

Increased exposure to product liability claims could adversely affect the Company's earnings.

Product liability is a major risk in testing and marketing biotechnology and pharmaceutical products offered by the Company's customers. Currently these risks are primarily borne by the Company's customers. As the Company's products and services are further integrated into customers' production processes, the Company may become increasingly exposed to product liability and other claims in the event that the use of its products or services is alleged to have resulted in adverse effects. There can be no assurance that a future product liability claim or series of claims brought against the Company would not have an adverse effect on the Company's business or the results of operations. The Company's business may be materially and adversely affected by a successful product liability claim or claims in excess of any insurance coverage that it may have. In addition, product liability claims, regardless of their merits, could be costly, divert management's attention, and adversely affect the Company's reputation and demand for its products.

Any such product liability claims brought against the Company could be significant and any adverse determination may result in liabilities in excess of the Company's insurance coverage. Although the Company carries product liability insurance, it cannot be certain that current insurance will be sufficient to cover these claims or that it can be maintained on acceptable terms, if at all.

Cyber security risks and the failure to maintain the confidentiality, integrity, and availability of the Company's computer hardware, software, and Internet applications and related tools and functions could result in damage to the Company's reputation and/or subject the Company to costs, fines, or lawsuits.

The integrity and protection of the Company's own data, and that of its customers and employees, is critical to the Company's business. The regulatory environment governing information, security and privacy laws is increasingly demanding and continues to evolve. Maintaining compliance with applicable security and privacy regulations may increase the Company's operating costs and/or adversely impact the Company's ability to market its products and services to customers. Although the Company's computer and communications hardware is protected through physical and software safeguards, it is still vulnerable to fire, storm, flood, power loss, earthquakes, telecommunications failures, physical or software break-ins, software viruses, and similar events. These events could lead to the unauthorized access, disclosure and use of non-public information. The techniques used by criminal elements to attack computer systems are sophisticated, change frequently and may originate from less regulated and remote areas of the world. As a result, the Company may not be able to address these techniques proactively or implement adequate preventative measures. If the Company's computer systems are compromised, it could be subject to fines, damages, litigation, and enforcement actions, customers could curtail or cease using its applications, and the Company could lose trade secrets, the occurrence of which could harm its business.

We are now subject to regulations related to "conflict minerals" which may cause us to incur additional expenses and could limit the supply and increase the cost of certain metals used in manufacturing our products.

With our acquisitions of ProteinSimple and CyVek in 2014, we now manufacture and sell products that may be covered under the Securities and Exchange Commission's (SEC) rule regarding "conflict minerals." We are now required to determine whether these products contain conflict minerals, and, if so, to perform an extensive inquiry into our supply chain in an effort to determine whether or not such conflict minerals originate from the Democratic Republic of Congo (DRC) or an adjoining country. Under the regulations, we are required to file a report with the SEC by May 31, 2017, to disclose and report whether or not such conflict minerals originate from the DRC or an adjoining country. Complying with this regulation could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals used in the manufacture of our products, including tantalum, tin, gold and tungsten. The number of suppliers who provide conflict-free minerals may be limited. In addition, there may be material costs associated with complying with the disclosure requirements, such as costs related to determining the source of certain minerals used in our products, as well as costs of possible changes to products, processes, or sources of supply as a consequence of such verification activities. We may not be able to sufficiently verify the origins of the relevant minerals used in our products through the due diligence procedures that we implement, which may harm our reputation. In addition, we may encounter challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free, which could place us at a competitive disadvantage if we are unable to do so.

ITEM 1B. UNRESOLVED STAFF COMMENTS

There are no unresolved staff comments as of the date of this report.

ITEM 2. PROPERTIES

The Company owns the facilities that its headquarters and R&D Systems subsidiary occupy in Minneapolis, Minnesota. The Minneapolis facilities are utilized by both the Company's Clinical Controls and Biotechnology segments.

The Minneapolis complex includes approximately 800,000 square feet of space in several adjoining buildings. Bio-Techne uses approximately 625,000 square feet of the complex for administrative, research, manufacturing, shipping and warehousing activities. The Company is currently leasing or plans to lease the remaining space in the complex as retail and office space.

The Company owns approximately 649 acres of farmland, including buildings, in southeast Minnesota. A portion of the land and buildings are leased to third parties as cropland and for a dairy operation. The remaining property is used by the Company to house animals for polyclonal antibody production for its Biotechnology segment.

Rental income from the above properties was $1.0 million, $1.0 million, and $0.8 million in fiscal 2015, 2014, and 2013, respectively.

The Company owns the 17,000 square foot facility that its R&D Europe subsidiary occupies in Abingdon, England. This facility is utilized by the Company's Biotechnology and Protein Platforms segments.

The Company leases the following facilities, all of which are utilized by the Company's Biotechnology segment with the exception of the location used by the Company's Bionostics subsidiary (Clinical Control segment), and the ProteinSimple and CyVek sites which support the Protein Platforms segment:

Subsidiary	*Location*	*Type*	*Square Feet*
R&D Systems Europe Ltd.	Langely, U.K.	Warehouse	14,300
R&D Systems GmbH	Wiesbaden-Nordenstadt, Germany	Office space	4,200
BiosPacific, Inc.	Emeryville, California	Office space	3,000
R&D Systems China Co., Ltd.	Shanghai and Bejing, China	Office/warehouse	5,700
Bio-Techne Hong Kong, Ltd.	Hong Kong	Office space	1,200
Boston Biochem, Inc.	Cambridge, Massachusetts	Office/lab	7,400
Tocris Crookson Limited	Bristol, United Kingdom	Office/manufacturing/lab/warehouse	40,900
Shanghai PrimeGene Bio-Tech Co., Ltd.	Shanghai, China	Office/manufacturing/lab	13,700
Bionostics, Inc.	Devens, Massachusetts	Office/manufacturing	48,000
Novus Biologicals, LLC	Littleton, Colorado	Office/warehouse	22,500
ProteinSimple	Santa Clara, California	Office/manufacturing/warehouse	167,000
ProteinSimple Canada	Ottawa and Toronto, Canada	Office/manufacturing/warehouse	10,000
ProteinSimple Japan	Tokyo, Japan	Office	3,500
CyVek Inc.	Wallingford, Connecticut	Office/manufacturing/warehouse	17,500

The Company is currently pursuing new lease space for its Tocris operations. The Company believes the owned and leased properties, other than the Tocris facility, are adequate to meet its occupancy needs in the foreseeable future.

ITEM 3. LEGAL PROCEEDINGS

As of August 26, 2015, the Company is not a party to any legal proceedings that, individually or in the aggregate, are reasonably expected to have a material adverse effect on the Company's business, results of operations, financial condition or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Price of Common Stock

The Company's common stock trades on the NASDAQ Global Select Market under the symbol "TECH." The following table sets forth for the periods indicated the high and low sales price per share for the Company's common stock as reported by the NASDAQ Global Select Market.

	Fiscal 2015 Price		*Fiscal 2014 Price*	
	High	*Low*	*High*	*Low*
1st Quarter	$ 97.15	$ 89.03	$ 83.83	$ 69.30
2nd Quarter	95.89	86.01	94.78	77.14
3rd Quarter	101.60	87.24	96.96	82.51
4th Quarter	103.56	95.37	93.06	82.63

Holders of Common Stock and Dividends Paid

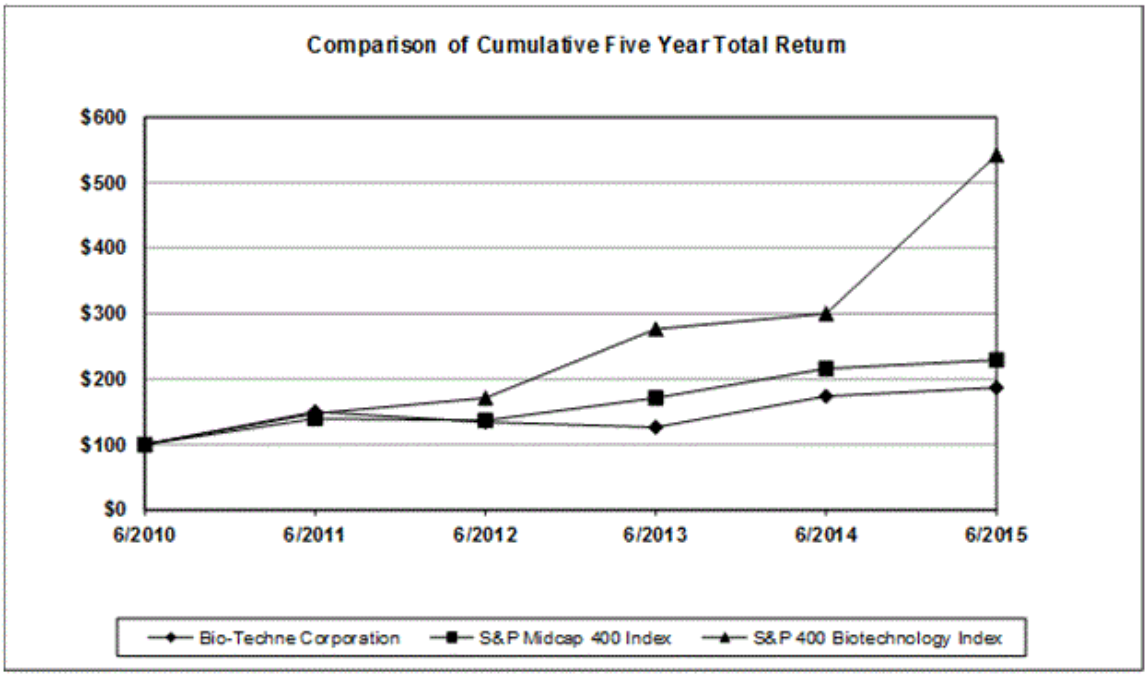
As of August 26, 2015, there were over 31,000 beneficial shareholders of the Company's common stock and over 150 shareholders of record. The Company paid quarterly cash dividends totaling $47.1 million, $45.4 million and $43.5 million in fiscal 2015, 2014 and 2013, respectively. The Board of Directors periodically considers the payment of cash dividends, and there is no guarantee that the Company will pay comparable cash dividends, or any cash dividends, in the future. The Company entered into a revolving line of credit in July 2014, which would prohibit payment of dividends to Company shareholders in the event of a default thereunder. The Credit Agreement that governs the revolving line of credit contains customary events of default.

Issuer Purchases of Equity Securities

There was no share repurchase activity by the Company in fiscal 2015. The maximum approximate dollar value of shares that may yet be purchased under the Company's existing stock repurchase plan is approximately $125 million. The plan does not have an expiration date.

Stock Performance Graph

The following chart compares the cumulative total shareholder return on the Company's common stock with the S&P Midcap 400 Index and the S&P 400 Biotechnology Index. The comparison assumes $100 was invested on the last trading day before July 1, 2010 in the Company's common stock and in each of the foregoing indices and assumes reinvestment of dividends.



ITEM 6. SELECTED FINANCIAL DATA

(dollars in thousands, except per share data)

Income and Share Data:	*2015* [1]	*2014* [2]	*2013*	*2012*	*2011* [3]
Net sales	$ 452,246	$ 357,763	$ 310,575	$ 314,560	$ 289,962
Operating income	147,023	159,750	158,469	166,209	163,055
Earnings before income taxes [4]	154,162	161,392	160,662	162,195	164,981
Net earnings	107,735	110,948	112,561	112,331	112,302
Diluted earnings per share	2.89	3.00	3.05	3.04	3.02
Average common and common equivalent shares - diluted (in thousands)	37,231	37,005	36,900	37,006	37,172

Balance Sheet Data as of June 30:	*2015*	*2014*	*2013*	*2012*	*2011*
Cash, cash equivalents and short-term available-for-sale investments	110,921	$ 363,354	$ 332,937	$ 268,986	$ 140,813
Working capital	208,515	443,022	377,432	310,757	212,229
Total assets	1,063,360	862,491	778,098	719,324	617,670

Cash Flow Data:	*2015*	*2014*	*2013*	*2012*	*2011*
Net cash provided by operating activities	$ 139,359	$ 136,762	$ 123,562	$ 126,746	$ 127,194
Capital expenditures	19,904	13,821	22,454	6,017	3,630
Cash dividends declared per share	1.27	1.23	1.18	1.11	1.07

Employee Data as of June 30:	*2015*	*2014*	*2013*	*2012*	*2011*
Employees	1,356	967	789	783	763

(1) The Company acquired Novus Holdings LLC (Novus) on July 2, 2014, ProteinSimple on July 31, 2014, and CyVek Inc. on November 3, 2014.

(2) The Company acquired Bionostics Holdings, Ltd on July 22, 2013 and Shanghai PrimeGene Bio-Tech Co. on April 30, 2014.

(3) The Company acquired Boston Biochem, Inc. on April 1, 2011 and Tocris Holdings Limited and subsidiaries on April 28, 2011.

(4) Earnings before income taxes included acquisition related expenses related to amortization of intangibles, costs recognized on sale of acquired inventories and professional fees associated with acquisition activity, as follows: 2015 - $37.6 million; 2014 - $20.0 million; 2013 - $10.2 million; 2012 - $12.7 million; 2011 - $5.0 million; 2010.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING INFORMATION

This report contains forward-looking statements, which are based on the Company's current assumptions and expectations. The principal forward-looking statements in this report include the Company's expectations regarding product releases and strategy, future financial results, acquisition activity, the competitive environment, currency fluctuation and exchange rates, capital expenditures, the performance of the Company's investments, future dividend declarations, the construction and lease of certain facilities, the adequacy of owned and leased property for future operations, anticipated financial results and sufficiency of capital resources to meet the Company's foreseeable future cash and working capital requirements.

All such forward-looking statements are intended to enjoy the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, as amended. Although the Company believes there is a reasonable basis for the forward-looking statements, the Company's actual results could be materially different. The most important factors which could cause the Company's actual results to differ from forward-looking statements are set forth in the Company's description of risk factors in Item 1A to this Annual Report on Form 10-K.

Forward-looking statements speak only as of the date they are made, and the Company does not undertake any obligation to update any forward-looking statements.

USE OF ADJUSTED FINANCIAL MEASURES

The adjusted financial measures used in this Annual Report on Form 10-K quantify the impact the following events had on reported net sales, gross margin percentages and net earnings for fiscal 2015 as compared to fiscal 2014 and 2013:

- fluctuations in exchange rates used to convert transactions in foreign currencies (primarily the Euro, British pound sterling and Chinese yuan) to U.S. dollars;

- the acquisitions in fiscal 2015 of CyVek, Inc. (CyVek) on November 4, 2014, ProteinSimple on July 31, 2014, and Novus Biologicals, LLC (Novus) on July 1, 2014 and in fiscal 2014 of Shanghai-based PrimeGene Bio-Tech Co. (PrimeGene) on April 30, 2014 and Bionostics Holdings, Ltd. (Bionostics) on July 22, 2013 including the impact of amortizing intangible assets and the recognition of costs upon the sale of inventory written-up to fair value;

- professional fees and other costs incurred as part of the acquisitions of CyVek, ProteinSimple, and Novus in fiscal 2015 and of Bionostics and PrimeGene in fiscal 2014;

- income tax adjustments related to the reinstatement of the U.S. credit for research and development expenditures in fiscal 2013, the expiration of the credit on December 31, 2013, and the reversal of valuation allowances on deferred tax assets in fiscal 2012; and

- the gain on the purchase of CyVek

These adjusted financial measures are not prepared in accordance with generally accepted accounting principles (GAAP) and may be different from adjusted financial measures used by other companies. Adjusted financial measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. The Company views these adjusted financial measures to be helpful in assessing the Company's ongoing operating results. In addition, these adjusted financial measures facilitate our internal comparisons to historical operating results and comparisons to competitors' operating results. These adjusted financial measures are included in this Annual Report on Form 10-K because the Company believes they are useful to investors in allowing for greater transparency related to supplemental information used in the Company's financial and operational analysis. Investors are encouraged to review the reconciliations of adjusted financial measures used in this Annual Report on Form 10-K to their most directly comparable GAAP financial measures.

OVERVIEW

Bio-Techne develops, manufactures and sells biotechnology products and clinical diagnostic controls worldwide. With our deep product portfolio and application expertise, Bio-Techne is a leader in providing specialized proteins, including cytokines and growth factors, and related immunoassays, small molecules and other reagents to the research, diagnostics and clinical controls markets.

Bio-Techne operates worldwide and has three reportable segments based on the nature of products; they are Biotechnology, Clinical Controls and Protein Platforms. The Biotechnology reporting segment develops, manufactures and sells biotechnology research and diagnostic products world-wide. The Clinical Controls reporting segment develops and manufactures controls and calibrators for the global clinical market. The Protein Platforms reporting segment includes the product lines associated with the acquisitions of ProteinSimple in July, 2014 and CyVek in November, 2014, both of which expand the Company's solutions that it can offer its customers by developing and commercializing proprietary systems and consumables for protein analysis.

OVERALL RESULTS

For fiscal 2015, consolidated net sales increased 26% as compared to fiscal 2014. After adjusting for the impact of the Novus, ProteinSimple and CyVek acquisitions in fiscal 2015, as well as foreign currency fluctuations, organic sales for the year increased 4% with currency translation having a negative impact of 2% and acquisitions contributing 25% to the revenue growth. The organic growth was broad-based, with the Company achieving growth in both the Biotechnology and Clinical Controls reporting segments. A strong bio-pharma end-market in the US and significant government funding of life science research in China were the biggest contributing factors impacting organic growth.

Consolidated GAAP net earnings decreased 3% for fiscal 2015 as compared to fiscal 2014. After adjusting for acquisition related costs and certain income tax items in both years, adjusted net earnings increased 1% in fiscal 2015 as compared to fiscal 2014. Adjusted earnings growth was driven by increased organic sales and contribution from acquisitions partially offset by a negative impact from foreign currency translation.

For fiscal 2014, consolidated net sales increased 15% as compared to fiscal 2013. After adjusting for the 11% impact of the Bionostics and PrimeGene acquisitions in fiscal 2014, as well as 2% positive impact of foreign currency fluctuations, organic sales for the year increased 3%. The growth was broad-based, with the Company achieving organic growth in both the Biotechnology and Clinical Controls reporting segments and in most regions of the world. Commercial investments made globally in fiscal 2014, especially in China, were the biggest contributing factor impacting organic revenue growth.

Consolidated GAAP net earnings decreased 1% for fiscal 2014 as compared to fiscal 2013. After adjusting for acquisition related costs and certain income tax items in both years, adjusted net earnings increased 6% in fiscal 2014 as compared to fiscal 2013. Adjusted earnings growth was driven by increased sales partially offset by a lower margin mix from the acquired Bionostics business, as well as investments made in commercial operations and administrative infrastructure during fiscal 2014.

RESULTS OF OPERATIONS

Net Sales

Consolidated organic net sales exclude the impact of net sales contributed by companies acquired during the fiscal year and the effect of the change from the prior year in exchange rates used to convert sales in foreign currencies (primarily British pound sterling, euros and Chinese yuan) into U.S. dollars.

Consolidated net sales growth was as follows:

	Year Ended June 30,	
	2015	*2014*
Organic sales growth	4%	3%
Acquisitions sales growth	25%	11%
Impact of foreign currency fluctuations	-2%	2%
Consolidated net sales growth (may not foot due to rounding)	26%	15%

Consolidated net sales by reportable segment were as follows (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Biotechnology	$ 325,897	$ 300,578	$ 288,156
Clinical Controls	60,377	57,185	22,419
Protein Platforms	66,247	0	0
Intersegment	(273)	0	0
Consolidated net sales	$ 452,247	$ 357,763	$ 310,575

In fiscal 2015, Biotechnology segment net sales increased 8% from the prior fiscal year. Included in fiscal 2015 Biotechnology segment net sales was $18.5 million generated by the acquisition of Novus Biologicals in July 2014 and the negative impact of foreign currency fluctuations of $8.5 million. Excluding these amounts, organic net sales for the segment increased 3% in fiscal 2015, driven by a strong bio-pharma end-market in the US and significant government funding of life science research in China. The academia and government end-market in the U.S. continued to improve sequentially each quarter in 2015, which the Company capitalized on through its distribution partnership with Fisher Scientific. In Europe, most countries experienced growth in 2015, but this growth was negated by the timing of research cycles experienced by the Company's large pharma customers located in Germany. The Pacific Rim regions delivered modest growth, with the exception of Japan, where the devaluation of the yen versus the US dollar encouraged local distributors to hold lower levels of inventory than in the prior year.

In fiscal 2015, Clinical Controls segment net sales increased 6%, with organic sales contributing 5% to growth and the acquisition of Bionostics contributing 1% to growth. Growth came equally from solid demand for both the segment's hematology-based controls and blood glucose/gas-based controls attributable to close relationships with our OEM customers.

In fiscal 2015, the new Protein Platforms segment generated net sales of $66.2 million. This segment includes the ProteinSimple product lines associated with the acquisitions of ProteinSimple in July, 2014 and CyVek in November, 2014, both of which expand the Company's solutions that it can offer its customers by developing and commercializing proprietary systems and consumables for protein analysis.

In fiscal 2014, Biotechnology segment net sales increased 4% from the prior fiscal year. Included in fiscal 2014 Biotechnology segment net sales was $0.7 million from the acquisition of PrimeGene in April 2014 and the positive impact of foreign currency fluctuations of $3.5 million. Excluding these amounts, organic net sales for the segment increased 3% in fiscal 2014, driven by the commercial investments made in China, solid execution from our Pacific Rim distributors, and a robust pharma and biotech market in the U.S. U.S. academic customers still suffered from decreases in NIH funding, but sales to these customers stabilized sequentially throughout fiscal 2014. Included in fiscal 2014 net sales were $3.4 million of sales of new biotechnology products released during the fiscal year.

In fiscal 2014, Clinical Controls segment net sales increased $34.8 million, or 61% from the prior fiscal year. Included in Clinical Controls segment net sales was $33.1 million from the acquisition of Bionostics in July 2013. Clinical Controls segment organic net sales increased 7% in fiscal 2014 from each of the prior fiscal year, primarily as a result of strong end-market demand and operational execution.

Gross Margins

Consolidated gross margins were 68%, 70% and 74% in fiscal 2015, 2014 and 2013, respectively. GAAP reported consolidated gross margins were negatively impacted as a result of purchase accounting related to inventory and intangible assets acquired during fiscal 2015, 2014, 2013 and prior years. Under purchase accounting, inventory is valued at fair value less expected selling and marketing costs, resulting in reduced margins in future periods as the inventory is sold. Excluding the impact of acquired inventory sold and amortization of intangibles, adjusted gross margins were 72%, 74% and 77% in fiscal 2015, 2014 and 2013, respectively.

A reconciliation of the reported consolidated gross margin percentages, adjusted for acquired inventory sold and intangible amortization included in cost of sales, is as follows:

	Year Ended June 30,		
	2015	*2014*	*2013*
Consolidated gross margin percentage	67.9%	70.3%	74.4%
Identified adjustments:			
Costs recognized upon sale of acquired inventory	1.5%	2.1%	1.4%
Amortization of intangibles	2.1%	1.1%	1.0%
Adjusted gross margin percentage	71.6%	73.5%	76.8%

Fluctuations in adjusted gross margins, as a percentage of net sales, have primarily resulted from changes in foreign currency exchange rates and changes in product mix. In fiscal 2015, the biggest impact to gross margin, as compared to fiscal 2014, was the change in product mix associated with the acquisitions of Novus, ProteinSimple, and CyVek. In fiscal 2014, the biggest impact to gross margin, as compared to fiscal 2013, was the change in product mix associated with the acquisition of Bionostics. We expect that, in the future, gross margins will continue to be impacted by future acquisitions as well as by the introduction and growth of lower-priced brands that will differentiate from our current premium brands, and allow the Company to better compete in more price-sensitive markets.

Segment gross margins, as a percentage of net sales, were as follows:

	Year Ended June 30,		
	2015	*2014*	*2013*
Biotechnology	77.8%	76.3%	76.4%
Clinical Controls	40.1%	38.5%	49.0%
Protein Platforms	57.8%		
Consolidated	67.9%	70.3%	74.4%

The Biotechnology segment gross margin percentage for fiscal 2015 was negatively impacted by purchase accounting and intangible asset amortization related to the Novus acquisition in July 2014, as well as foreign currency translation, as discussed above. The Clinical Controls segment gross margin percentage for fiscal 2015 and 2014 was negatively impacted by purchase accounting and intangible asset amortization related to the acquisition of Bionostics in July 2013, as discussed above, as well as reduced pricing for it's glucose-based control products

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased $58.7 million (97%) and $17.3 million (40%) in fiscal 2015 and 2014, respectively. The increase in fiscal 2015 was mainly the result of the acquisitions of Novus, ProteinSimple, and CyVek including $37.1 million of selling, general and administrative expenses by the acquired companies and an increase of $10.5 million of intangible amortization compared to fiscal 2014. Selling, general and administrative expenses in fiscal 2015 also included $4.5 million of acquisition related professional fees. The remaining increase in selling, general and administrative expenses in fiscal 2015 included investments made in global commercial resources, administrative infrastructure, non-cash stock based compensation, and annual wage, salary and benefits increases.

The increase in fiscal 2014 was mainly the result of the acquisitions of Bionostics and PrimeGene, including $4.2 million of selling, general and administrative expenses by the acquired companies and an increase of $4.0 million of intangible amortization. Selling, general and administrative expenses in fiscal 2014 also included $2.2 million of acquisition related professional fees. The remaining increase in selling, general and administrative expenses in fiscal 2014 included investments made in global commercial resources, administrative infrastructure, and annual wage, salary and benefits increases.

Consolidated selling, general and administrative expenses were composed of the following (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Biotechnology	$ 59,359	$ 42,863	$ 37,421
Clinical Controls	10,278	9,765	1,561
Protein Platforms	39,144		
Unallocated corporate expenses	10,620	8,088	4,402
	$ 119,401	$ 60,716	$ 43,384

Research and Development Expenses

Research and development expenses increased $9.9 million (32%) and $1.7 million (6%) in fiscal 2015 and 2014, respectively, as compared to prior-year periods. Included in research and development expense in fiscal 2015 and 2014 was $11.0 million and $0.9 million of expenses by the companies acquired during fiscal 2015 and 2014, respectively. The remaining expenditures for fiscal 2015 and 2014 were primarily related to the development of new proteins, antibodies and assay kits within the Biotechnology segment, although fiscal 2015 research and development expenses were slightly lower within the Biotechnology segment than in prior years. The Company introduced approximately 1,600 new biotechnology products in fiscal 2015 and in fiscal 2014. Research and development expenses were composed of the following (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Biotechnology	$ 28,001	$ 29,189	$ 28,441
Clinical Controls	1,828	1,756	816
Protein Platforms	11,023		
	$ 40,852	$ 30,945	$ 29,257

Net Interest Income (Expense)

Net interest income/(expense) for fiscal 2015, 2014 and 2013 was ($0.9) million, $2.7 million, and $2.6 million respectively. Net interest expense in fiscal 2015 resulted from the opening of a debt facility in July 2014 to partially fund the acquisitions of Novus, ProteinSimple, and CyVek. Interest income in fiscal 2014 remained flat from fiscal 2013 due to an increase in cash flow slightly offset by cash used for the acquisition of Bionostics in the first quarter of fiscal 2014.

Other Non-operating Expense, Net

Other non-operating expense, net, consists of foreign currency transaction gains and losses, rental income, building expenses related to rental property and the Company's share of gains and losses from equity method investees as follows (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Foreign currency (losses) gains	$ 372	$ (128)	$ 339
Rental income	1,014	1,026	830
Real estate taxes, depreciation and utilities	(2,547)	(1,940)	(2,192)
Net gain (loss) from equity method investees	8,300	0	570
	$ 7,139	$ (1,042)	$ (453)

Other non-operating expenses, net for the twelve months ended June 30, 2015 included a non-taxable gain of $8.3 million on the Company's previous investment in CyVek discussed above.

Income Taxes

Income taxes for fiscal 2015, 2014 and 2013 were provided at rates of 30.1%, 31.3%, and 29.9%, respectively, of consolidated earnings before income taxes. The impact of prior year acquisitions resulted in a net increase in the rate due to additional anticipated state tax filings in comparison to prior year. This increase was offset by other discrete items including the non-taxable CyVek gain as well as an increased tax benefit resulting from a dividend paid from R&D Systems Europe.

In January 2013, the U.S. federal credit for research and development was reinstated for the period of January 2012 through December 2013. As a result, fiscal 2014 included a credit of $0.5 million for the period of July 2013 through December 2013, while fiscal 2013 included a credit of $1.4 million for the period of January 2012 to June 2013.

U.S. federal taxes have been reduced by the manufacturer's deduction provided for under the American Jobs Creation Act of 2004 and the U.S. federal credit for research and development. Foreign income taxes have been provided at rates which approximate the tax rates in the countries in which the Company has operations.

Net Earnings

Adjusted consolidated net earnings are as follows (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Net earnings	$ 107,735	$ 110,948	$ 112,561
Identified adjustments:			
Costs recognized upon sale of acquired inventory	6,958	7,479	4,501
Amortization of intangibles	26,169	10,267	5,061
Professional and other acquisition related costs	4,519	2,247	607
Gain in investments	(8,300)	0	0
Tax impact of above adjustments	(11,735)	(5,305)	(2,596)
Tax impact of research and development credit	(910)	(476)	(1,392)
Tax impact of deemed dividend and state and foreign adjustments	2,321	165	(710
Adjusted net earnings	$ 126,758	$ 125,325	$ 118,032
Adjusted net earnings growth	1%	6%	

LIQUIDITY AND CAPITAL RESOURCES

Cash, cash equivalents and available-for-sale investments at June 30, 2015 were $111 million compared to $367 million at June 30, 2014. Included in available-for-sale investments at June 30, 2015 and June 30, 2014 was the fair value of the Company's investment in CCXI of $52.3 million and 37.1 million, respectively.

At June 30, 2015, approximately 42%, 23%, and 15% of the Company's cash and equivalent account balances of $55 million were located in the U.S., China, and Canada respectively with the remainder located in the U.K. and other European countries. At June 30, 2015, approximately 93% of the Company's available-for-sale investment accounts are located in the U.S., with the remaining 7% in China.

The Company has either paid U.S. taxes on its undistributed foreign earnings or intends to indefinitely reinvest the undistributed earnings in the foreign operations or expects the earnings will be remitted in a tax neutral transaction. Management of the Company expects to be able to meet its cash and working capital requirements for operations, facility expansion, capital additions, and cash dividends for the foreseeable future, and at least the next 12 months, through currently available funds including funds available through our line-of-credit and cash generated from operations.

During fiscal 2015, the Company acquired Novus, ProteinSimple, and CyVek for approximately $60 million, $300 million and $95 million, respectively. The Novus acquisition was financed through cash on hand. The purchases of ProteinSimple and CyVek were financed through cash on hand and a $150 million revolving line of credit facility that was opened in July 2014. This senior unsecured revolving credit facility has a term of five years with an adjustable interest rate equal to the greater of (i) the prime commercial rate, (ii) the per annum federal funds rate plus 0.5%, or (iii) LIBOR + 1.00% - 1.75% depending on the existing total leverage ratio of Debt to EBITDA (as defined in the Credit Agreement governing the revolving credit facility). The financial covenants of the revolving credit facility require the Company to maintain a minimum Interest Coverage Ratio, defined as the ratio of EBIT to cash interest expense, of 4.0x and a maximum total leverage ratio of 3.5x. The annualized fee for any unused portion of the credit facility is 15 basis points.

Future acquisition strategies may or may not require additional borrowings under the line of credit facility or other outside sources of funding.

Cash Flows From Operating Activities

The Company generated cash from operations of $139 million, $137 million and $124 million in fiscal 2015, 2014 and 2013, respectively. The increase in cash generated from operating activities in fiscal 2015 as compared to fiscal 2014 and in fiscal 2014 compared to fiscal 2013 was mainly the result of increase in net earnings after adjustment for non-cash expenses related to depreciation, amortization, costs recognized on sale of acquired inventory, and stock based compensation expense. Operating cash flow also benefitted from the timing of certain trade receivable cash receipts, trade payable cash disbursements, and income tax payments in fiscal 2014 compared to fiscal 2013.

Cash Flows From Investing Activities

On July 22, 2013, the Company acquired for cash all of the outstanding shares of Bionostics for a net purchase price of approximately $103 million. The acquisition was financed through cash and cash equivalents on hand. On April 30, 2014, the Company acquired all of the ownership interest of PrimeGene for a net purchase price of approximately $18.8 million. The Company paid approximately $6.0 million at closing, with the remaining purchase price payable over fiscal years 2015 to 2017. The acquisition cash payment was financed through cash and cash equivalents on hand and sale of certain short-term available-for-sale investments.

On July 2, 2014, the Company acquired, for a net purchase price of approximately $60 million cash, all of the issued and outstanding equity interests of Novus Holdings LLC (Novus), including its subsidiary, Novus Biologicals, LLC. The acquisition was financed through cash and cash equivalents on hand.

On July 31, 2014, the Company acquired ProteinSimple for a net purchase price of approximately $300 million. The transaction was financed through cash on hand and a revolving line-of-credit facility.

On November 3, 2014, the Company acquired CyVek for a net cash payment of $60 million on the date of acquisition and certain future contingent payments of approximately $35 million. The cash paid at the acquisition date was financed through cash on hand and a revolving line-of-credit facility.

The Company’s net proceeds from the purchase, sale and maturity of available-for-sale investments in fiscal 2015, 2014 and 2013 were $13 million, $184 million and ($9) million, respectively. Most of the Company’s available-for-sale investments in the U.S. (other than its investment in CCXI) were liquidated by fiscal 2014 year-end to prepare for the July purchase of Novus and ProteinSimple. The Company’s investment policy is to place excess cash in municipal and corporate bonds with the objective of obtaining the highest possible return while minimizing risk and keeping the funds accessible.

Capital additions consisted of the following (in thousands):

	Year Ended June 30, 2015	2014	2013
Laboratory, manufacturing, and computer equipment	$ 9,213	$ 6,626	$ 2,882
Construction/renovation	10,691	7,195	19,572
	$ 19,904	$ 13,821	$ 22,454

Construction/renovation for fiscal 2015 included $3.8 million related to the relocation and expansion of the Company's Tocris facilities in the U.K. Construction and renovation for fiscal 2014 and 2013 included $6.5 million and $18.0 million, respectively, related to the renovation of a building on the Company's Minneapolis campus which was completed in fiscal 2014. Capital additions planned for fiscal 2016 are approximately $20 million and are expected to be financed through currently available cash and cash generated from operations. Included in the planned fiscal 2016 capital expenditures are approximately $5.6 million for leasehold improvements and equipment needed to complete the relocation and expansion of the Company's Tocris facilities in the U.K.

Cash Flows From Financing Activities

In fiscal 2015, 2014 and 2013, the Company paid cash dividends of $47.1 million, $45.4 million and $43.5 million, respectively. The Board of Directors periodically considers the payment of cash dividends.

The Company received $9.7 million, $8.3 million, and $1.1 million for the exercise of options for 241,000, 141,000, and 22,000 shares of common stock in fiscal 2015, 2014 and 2013, respectively. The Company recognized excess tax benefits from stock option exercises of $0.6 million, $0.3 million, $0.1 million in fiscal 2015, 2014 and 2013, respectively.

In fiscal 2013, the Company purchased 8,324 shares of common stock, for its employee stock bonus plans at a cost of $0.6 million.

During fiscal 2015, the Company drew $163 million under its revolving line-of-credit facility to partially fund its acquisitions of ProteinSimple and CyVek. The Company made payments on the line-of-credit and other debt of $95 million.

In April 2009, the Board of Directors authorized a plan for the repurchase and retirement of $60 million of its common stock. In October 2012, the Board of Directors increased the amount authorized under the plan by $100 million. The plan does not have an expiration date. In fiscal 2013, the Company purchased and retired 28,000 and shares of common stock at market values of $1.8 million. There were no stock repurchases in fiscal 2015 or 2014. At June 30, 2015, approximately $125 million remained available for purchase under the above authorizations. There were no share repurchase activity by the Company in fiscal 2015.

CONTRACTUAL OBLIGATIONS

The following table summarizes the Company's contractual obligations and commercial commitments as of June 30, 2015 (in thousands):

		Payments Due by Period			
	Total	Less than 1 Year	1-2 Years	3-4 Years	After 5 Years
Operating leases	$ 47,648	$ 5,578	$ 10,883	$ 8,679	$ 22,508
Minimum royalty payments	160	160	0	0	0
CyVek acquisition [1]	35,000	0	35,000	0	0
	$ 82,808	$ 5,738	$ 45,883	$ 8,679	$ 22,508

(1) Amounts represent the maximum potential contingent liability under the CyVek Merger Agreement. In addition, the Company will pay CyVek's other stockholders up to 50% of the amount, if any, by which revenues of CyVek's products and related products exceeds $100 million in calendar year 2020.

OFF-BALANCE SHEET ARRANGEMENTS

The Company is not a party to any off-balance sheet transactions, arrangements or obligations that have, or are reasonably likely to have, a current or future material effect on the Company's financial condition, changes in the financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

CRITICAL ACCOUNTING POLICIES

Management's discussion and analysis of the Company's financial condition and results of operations are based upon the Company's Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates its estimates. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The Company has identified the policies outlined below as critical to its business operations and an understanding of results of operations. The listing is not intended to be a comprehensive list of all accounting policies; investors should also refer to Note A to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K .

Valuation of Available-For-Sale Investments

The Company considers all of its marketable securities available-for-sale and reports them at fair market value. Fair market values are based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. Unrealized gains and losses on available-for-sale investments are excluded from income, but are included, net of taxes, in other comprehensive income. If an "other-than-temporary" impairment is determined to exist, the difference between the value of the investment recorded in the financial statements and the Company's current estimate of fair value is recognized as a charge to earnings in the period in which the impairment is determined. Net unrealized gains on available-for-sale investments at June 30, 2015 were $14.3 million.

Valuation of Inventory

Inventories are stated at the lower of cost (first-in, first-out method) or market. The Company regularly reviews inventory on hand for slow-moving and obsolete inventory, inventory not meeting quality control standards and inventory subject to expiration.

To meet strict customer quality standards, the Company has established a highly controlled manufacturing process for proteins, antibodies and its chemically-based products. These products require the initial manufacture of multiple batches to determine if quality standards can be consistently met. In addition, the Company will produce larger batches of established products than current sales requirements due to economies of scale. The manufacturing process for these products, therefore, has and will continue to produce quantities in excess of forecasted usage. The Company values its manufactured protein and antibody inventory based on a two-year forecast and its chemically-based products on a five-year forecast. The establishment of a two-year or five-year forecast requires considerable judgment. Inventory quantities in excess of the forecast are not valued due to uncertainty over salability. The value of protein, antibody and chemically-based product inventory not valued at June 30, 2015 was $24 million.

The fair value of inventory purchased through acquisitions was determined based on quantities acquired, selling prices at the date of acquisition and management's assumptions regarding inventory having future value and the costs to sell such inventories. Inventory purchased in fiscal 2015 through the acquisitions of Novus, ProteinSimple, and CyVek was increased $4.1 million, $1.4 million and $0.1 million respectively. The increase in value of the fiscal 2015 acquired inventory remaining at June 30, 2015 was $2.3 million for Novus. Substantially all of ProteinSimple and CyVek acquired inventory was sold as of June 30, 2015.

Inventory purchased in fiscal 2014 through the acquisition of Bionostics and PrimeGene was increased $1.7 million to $5.7 million and $0.8 million to $1.0 million, respectively. Substantially all of Bionostics and PrimeGene acquired inventory was sold as of June 30, 2015.

Valuation of Intangible Assets and Goodwill

When a business is acquired, the purchase price is allocated, as applicable, between tangible assets, identifiable intangible assets and goodwill. Determining the portion of the purchase price allocated to intangible assets requires significant estimates. The fair value of intangible assets acquired, including developed technologies, trade names, customer relationships and non-compete agreements, were based on management's forecasted cash inflows and outflows using a relief-from-royalty and multi-period excess earnings method with consideration to other factors including an independent valuation of management's assumptions. Intangible assets are being amortized over their estimated useful lives, ranging from 3 to 20 years. The Company reviews the carrying amount of intangible assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Intangible assets, net of accumulated amortization, were $293 million at June 30, 2015.

Goodwill recognized in connection with a business acquisition represents the excess of the aggregate purchase price over the fair value of net assets acquired. Goodwill is tested for impairment annually or more frequently if changes in circumstance or the occurrence of events suggest impairment exists. Assessing the impairment of goodwill requires the Company to make judgments regarding the fair value of the net assets of its reporting units and the allocation of the carrying amount of shared assets to the reporting units. The Company's annual assessment included a qualitative assessment of whether it is more-likely-than-not that a reporting unit's fair value is less than its carrying value. A significant change in the Company's market capitalization or in the carrying amount of net assets of a reporting unit could result in an impairment charge in future periods. The Company completed its annual impairment testing of goodwill and concluded that no impairment existed as of June 30, 2015, as the fair values of the Company's reporting units exceeded their carrying values. Goodwill at June 30, 2015 was $391 million.

Valuation of Investments

The Company has made equity investments in several start-up and early development stage companies, including CyVek in fiscal 2014. The accounting treatment of each investment (cost method or equity method) is dependent upon a number of factors, including, but not limited to, the Company's share in the equity of the investee and the Company's ability to exercise significant influence over the operating and financial policies of the investee. In determining which accounting treatment to apply, the Company must make judgments based upon the quantitative and qualitative aspects of the investment.

The Company periodically assesses its equity investments for impairment. Development stage companies of the type the Company has invested in are dependent on their ability to raise additional funds to continue research and development efforts and on receiving patent protection and/or FDA clearance to market their products. If such funding were unavailable or inadequate to fund operations or if patent protection or FDA clearance were not received, the Company would potentially recognize an impairment loss to the extent of its remaining net investment.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

At the end of fiscal 2015, the Company had a portfolio of equity securities, excluding those classified as cash and cash equivalents, of $56.4 million (see Note 3 to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K). As the Company's securities are classified as available-for-sale, unrealized gains or losses are recognized by the Company in "Other comprehensive income (loss)" on the Consolidated Statement of Earnings and Comprehensive Income.

The Company operates internationally, and thus is subject to potentially adverse movements in foreign currency exchange rates. Approximately 18% of the Company's consolidated net sales in fiscal 2015 were made in foreign currencies, including 6% in euro, 4% in British pound sterling, 5% in Chinese yuan and the remaining 3% in other European and Asian currencies. As a result, the Company is exposed to market risk mainly from foreign exchange rate fluctuations of the euro, British pound sterling, and the Chinese yuan as compared to the U.S. dollar as the financial position and operating results of the Company's foreign operations are translated into U.S. dollars for consolidation. In fiscal 2015, for example, the exchange rate between the Euro and the US dollar changed materially, resulting in consolidated net sales that were approximately $8.5 million lower in fiscal 2015 compared to fiscal 2014.

Month-end exchange rates between the British pound sterling, euro and Chinese yuan and the U.S. dollar, which have not been weighted for actual sales volume in the applicable months in the periods, were as follows:

	Year Ended June 30,		
	2015	*2014*	*2013*
British pound:			
High	$ 1.69	$ 1.71	$ 1.62
Low	1.48	1.52	1.52
Average	1.57	1.64	1.57
Euro:			
High	$ 1.34	$ 1.39	$ 1.36
Low	1.08	1.32	1.23
Average	1.19	1.36	1.30
Chinese yuan:			
High	$ .164	$ .165	$ .163
Low	.162	.160	.157
Average	.163	.163	.160

The Company's exposure to foreign exchange rate fluctuations also arises from trade receivables and intercompany payables denominated in one currency in the financial statements, but receivable or payable in another currency. At June 30, 2015, the Company had the following trade receivable and intercompany payables denominated in one currency but receivable or payable in another currency (in thousands):

	Denominated Currency	*U. S. Dollar Equivalent*
Accounts receivable in:		
Euros	£ 451	$ 709
British Pound Sterling	£ 1,529	$ 2,402
Intercompany payable in:		
Euros	£ 451	$ 771
U.S. dollars	£ 2,956	$ 5,057
U.S. dollars	yuan 20,332	$ 3,305

All of the above balances are revolving in nature and are not deemed to be long-term balances.

The Company does not enter into foreign currency forward contracts to reduce its exposure to foreign currency rate changes on forecasted intercompany sales transactions or on intercompany foreign currency denominated balance sheet positions. Foreign currency transaction gains and losses are included in "Other non-operating expense, net" in the Consolidated Statement of Earnings and Comprehensive Income. The effect of translating net assets of foreign subsidiaries into U.S. dollars are recorded on the Consolidated Balance Sheet as part of "Accumulated other comprehensive income (loss)."

The effects of a hypothetical simultaneous 10% appreciation in the U.S. dollar from June 30, 2015 levels against the euro, British pound sterling and Chinese yuan are as follows (in thousands):

Decrease in translation of 2015 earnings into U.S. dollars	$	3,352
Decrease in translation of net assets of foreign subsidiaries		26,808
Additional transaction losses		409

See Notes to Consolidated Financial Statements.

Note 1. Description of Business and Summary of Significant Accounting Policies:

Description of business: Bio-Techne Corporation and subsidiaries, collectively doing business as Bio-Techne (the Company) develop, manufacture and sell biotechnology products and clinical diagnostic controls worldwide. With its deep product portfolio and application expertise, Bio-Techne is a leader in providing specialized proteins, including cytokines and growth factors, and related immunoassays, small molecules and other reagents to the research, diagnostics and clinical controls markets.

Estimates: The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates include the valuation of accounts receivable, available-for-sale investments, inventory, intangible assets, stock based compensation and income taxes. Actual results could differ from these estimates.

Principles of consolidation: The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated.

Translation of foreign financial statements: Assets and liabilities of the Company's foreign operations are translated at year-end rates of exchange and the resulting gains and losses arising from the translation of net assets located outside the U.S. are recorded as other comprehensive income (loss) on the consolidated statement of earnings and comprehensive income. The cumulative translation adjustment is a component of accumulated other comprehensive income (loss) on the consolidated balance sheets. Foreign statements of earnings are translated at the average rate of exchange for the year. Foreign currency transaction gains and losses are included in other non-operating expense in the consolidated statements of earnings.

Revenue recognition: The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the price is fixed or determinable and collectability is reasonably assured. Payment terms for shipments to end-users are generally net 30 days. Payment terms for distributor shipments may range from 30 to 90 days. Freight charges billed to end-users are included in net sales and freight costs are included in cost of sales. Freight charges on shipments to distributors are paid directly by the distributor. Any claims for credit or return of goods must be made within 10 days of receipt. Revenues are reduced to reflect estimated credits and returns. Sales, use, value-added and other excise taxes are not included in revenue.

Research and development: Research and development expenditures are expensed as incurred. Development activities generally relate to creating new products, improving or creating variations of existing products, or modifying existing products to meet new applications.

Advertising costs: Advertising expenses (including production and communication costs) were $4.1 million, $3.4 million, and $3.2 million for fiscal 2015, 2014, and 2013, respectively. The Company expenses advertising expenses as incurred.

Share-based compensation: The cost of employee services received in exchange for the award of equity instruments is based on the fair value of the award at the date of grant. Separate groups of employees that have similar historical exercise behavior with regard to option exercise timing and forfeiture rates are considered separately in determining option fair value. Compensation cost is recognized using a straight-line method over the vesting period and is net of estimated forfeitures. Stock option exercises and stock awards are satisfied through the issuance of new shares.

Income taxes: The Company uses the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities are recognized to record the income tax effect of temporary differences between the tax basis and financial reporting basis of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Tax positions taken or expected to be taken in a tax return are recognized in the financial statements when it is more likely than not that the position would be sustained upon examination by tax authorities. A recognized tax position is then measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense.

Financial instruments not measured at fair value: Certain of the Company's financial instruments are not measured at fair value but nevertheless are recorded at carrying amounts approximating fair value, based on their short-term nature. These financial instruments include cash and cash equivalents, accounts receivable, accounts payable and other current liabilities.

Cash and equivalents: Cash and cash equivalents include cash on hand and highly-liquid investments with original maturities of three months or less.

Available-for-sale investments: Available-for-sale investments consist of debt instruments with original maturities of generally three months to three years and equity securities. Available-for-sale investments are recorded based on trade-date. The Company considers all of its marketable securities available-for-sale and reports them at fair value. The Company utilizes valuation techniques for determining fair market value which maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. The Company determines fair value based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the reporting entity at the measurement date.

Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at measurement date.

Unrealized gains and losses on available-for-sale securities are excluded from income, but are included, net of taxes, in other comprehensive income. If an "other-than-temporary" impairment is determined to exist, the difference between the value of the investment security recorded in the financial statements and the Company's current estimate of the fair value is recognized as a charge to earnings in the period in which the impairment is determined.

Inventories: Inventories are stated at the lower of cost (first-in, first-out method) or market. The Company regularly reviews inventory on hand for slow-moving and obsolete inventory, inventory not meeting quality control standards and inventory subject to expiration. To meet strict customer quality standards, the Company has established a highly controlled manufacturing process for proteins, antibodies and its chemically-based products. These products require the initial manufacture of multiple batches to determine if quality standards can be consistently met. In addition, the Company will produce larger batches of established products than current sales requirements due to economies of scale. The manufacturing process for these products, therefore, has and will continue to produce quantities in excess of forecasted usage. The Company values its manufactured protein and antibody inventory based on a two-year forecast and its chemically-based products on a five-year forecast. Inventory quantities in excess of the forecast are not valued due to uncertainty over salability. Sales of previously unvalued protein, antibody and chemically-based inventory for fiscal years 2015, 2014, and 2013 were not material.

Property and equipment: Property and equipment are recorded at cost. Equipment is depreciated using the straight-line method over an estimated useful life of five years. Buildings, building improvements and leasehold improvements are amortized over estimated useful lives of 5 to 40 years. Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In the current year, the Company has identified no such events.

Goodwill: At June 30, 2015 and 2014, the Company had recorded goodwill of $390.6 million and $151.5 million, respectively. The Company tests goodwill at least annually for impairment. The Company completed its annual impairment testing of goodwill and concluded that no impairment existed as of June 30, 2015.

Intangible assets: Intangible assets are being amortized over their estimated useful lives. Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In the current year, the Company has identified no such events.

Investments in unconsolidated entities: The Company has equity investments in several start-up and early development stage companies. The accounting treatment of each investment (cost method or equity method) is dependent upon a number of factors, including, but not limited to, the Company's share in the equity of the investee and the Company's ability to exercise significant influence over the operating and financial policies of the investee.

Note 2. Acquisitions:

Bionostics Holdings, Ltd.: On July 22, 2013, the Company acquired for cash all of the outstanding shares of Bionostics Holdings, Ltd. (Bionostics) and its U.S. operating subsidiary, Bionostics, Inc. Bionostics is a global leader in the development, manufacture and distribution of control solutions that verify the proper operation of *in-vitro* diagnostic devices primarily utilized in point of care blood glucose and blood gas testing. Bionostics is included in the Company's Clinical Controls segment.

In connection with the Bionostics acquisition, the Company recorded $14.4 million of developed technology intangible assets that have an estimated useful life of 9 years, $2.7 million of trade name intangible assets that have an estimated useful life of 5 years, $2.4 million related to non-compete agreements that have an estimated useful life of 3 years, and $41.0 million related to customer relationships that have an estimated useful life of 14 years. The intangible asset amortization is not deductible for income tax purposes.

The goodwill recorded as a result of the Bionostics acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration from future products and customers. The goodwill is not deductible for income tax purposes.

Transaction costs of $0.5 million and $0.6 million were included in the Company's selling, general and administrative costs during fiscal 2014 and 2013, respectively, related to the Bionostics acquisition.

Shanghai PrimeGene Bio-Tech Co.: On April 30, 2014, the Company acquired all of the ownership interest of Shanghai PrimeGene Bio-Tech Co. (PrimeGene). PrimeGene manufactures recombinant proteins and is included in the Company's Biotechnology segment. The Company paid approximately $6.0 million at closing, with the remaining purchase price payable over fiscal years 2015 to 2017. The note payable is due to individuals who are currently employed by PrimeGene.

In connection with the PrimeGene acquisition, the Company recorded $2.2 million of developed technology intangible assets that have an estimated useful life of 9 years, $3.0 million of trade name intangible assets that have an estimated useful life of 11 years, $0.3 million related to non-compete agreements that have an estimated useful life of 3 years, and $9.1 million related to customer relationships that have an estimated useful life of 9 years. The intangible asset amortization is not deductible for income tax purposes.

The goodwill recorded as a result of the PrimeGene acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration from future products and customers. The goodwill is not deductible for income tax purposes.

Transaction costs of $0.4 million were included in the Company's selling, general and administrative costs during fiscal 2014, related to the PrimeGene acquisition.

Novus Holdings LLC: On July 2, 2014, the Company acquired all of the issued and outstanding equity interests of Novus Holdings LLC (Novus). Novus broadens the Company's antibody offerings by being a supplier of a large portfolio of both outsourced and in-house developed antibodies and other reagents for life science research. Novus is included in the Company's Biotechnology segment.

In connection with the Novus acquisition, the Company recorded $5.0 million of developed technology intangible assets that have estimated useful lives of 4-12 years, $5.3 million of trade name intangible assets that have an estimated useful life of 20 years, and $14.4 million related to customer relationships that have an estimated useful life of 15 years. The majority of the intangible asset amortization is not deductible for income tax purposes.

The goodwill recorded as a result of the Novus acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration from future products and customers. The majority of the goodwill is not deductible for income tax purposes.

Transaction costs of $0.1 million were included in the Company's selling, general and administrative costs during fiscal 2015 related to the Novus acquisition.

ProteinSimple: On July 31, 2014, the Company acquired ProteinSimple. ProteinSimple expands the Company's solutions that it can offer its customers by developing and commercializing proprietary systems and consumables for protein analysis. The Company opened a line-of-credit (Note 7) to partially fund the acquisition. The purchase price of ProteinSimple exceeded the fair value of the identifiable net assets and, accordingly, the difference was allocated to goodwill. ProteinSimple is included in the Company's Protein Platform segment.

In connection with the ProteinSimple acquisition, the Company recorded $40.5 million of developed technology intangible assets that have an estimated useful lives of 9-10 years, $35.8 million of trade name intangible assets that have an estimated useful lives of 18-20 years, $100.6 million related to customer relationships that have estimated useful lives of 14-16 years, and $0.2 million related to non-compete agreements that have an estimated useful life of 3 years. The intangible asset amortization is not deductible for income tax purposes.

The goodwill recorded as a result of the ProteinSimple acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration from future products and customers. The goodwill is not deductible for income tax purposes.

Transaction costs of $0.8 million were included in the Company's selling, general and administrative costs during fiscal 2015 related to the ProteinSimple acquisition.

CyVek Inc.: On November 3, 2014, the Company acquired CyVek, Inc. (CyVek) through a merger. CyVek has developed a transformative immunoassay technology which integrates an innovatively designed microfluidic cartridge with a state-of-the-art analyzer to deliver the most advanced and efficient bench top immunoassay system. In fiscal 2014, the Company entered into an Agreement of Investment and Merger (the Agreement) with CyVek. Pursuant to the terms of the Agreement, the Company invested $10.0 million in CyVek and received shares of Common Stock representing approximately 19.9% of the outstanding voting stock of CyVek. Between the time of the Company's initial investment and November 3, 2014, CyVek met certain commercial milestones related to the sale of its products, which obligated the Company to acquire CyVek through a merger, with CyVek surviving as a wholly-owned subsidiary of the Company.

The Company made an initial payment of approximately $62.0 million to the other stockholders of CyVek on November 3, 2014. Such purchase price was adjusted after closing based on the final levels of cash, indebtedness and transaction expenses of CyVek as of the closing. The Company will also pay CyVek's previous stockholders up to $35.0 million based on the revenue generated by CyVek's products before May 3, 2017 (30 months from the closing of the Merger). The Company will also pay CyVek's previous stockholders 50% of the amount, if any, by which the revenue from CyVek's products and related products exceeds $100 million in calendar year 2020. The Company has recorded the present value of these contingent payments as a long-term liability of $35.0 million at June 30, 2015. In addition, at November 3, 2014, the Company re-measured its previous investment in CyVek to acquisition-date fair value, resulting in a gain on the investment of $8.3 million which is included in Other income on the Condensed Consolidated Statements of Earnings and Comprehensive Income. The purchase price of CyVek exceeded the fair value of the identifiable net assets and, accordingly, the difference was allocated to goodwill, substantially all of which is not tax deductible. CyVek is included in the Company's Protein Platforms segment.

In connection with the CyVek acquisition, the Company recorded $20.2 million of developed technology intangible assets that have an estimated useful life of 15 years, $0.1 million of trade name intangible assets that have an estimated useful life of 1.5 years, and $0.6 million related to customer relationships that have an estimated useful life of 10 years. The intangible asset amortization is not deductible for income tax purposes.

The goodwill recorded as a result of the CyVek acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration from future products and customers. The goodwill is not deductible for income tax purposes.

Transaction costs of $0.1 million were included in the Company's selling, general and administrative costs during fiscal 2015 related to the CyVek acquisition.

The aggregate purchase price of the acquisitions was allocated to the assets acquired and liabilities assumed based on their estimated fair values at the date of acquisition. The estimate of the excess of purchase price over the fair value of net tangible assets acquired was allocated to identifiable intangible assets and goodwill. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed as a result of the acquisitions (in thousands):

	Novus	*Protein-Simple*	*CyVek*	*Bionostics*	*PrimeGene*
Current assets	$ 10,739	$ 19,660	$ 1,206	$ 9,605	$ 1,272
Equipment	1,266	1,983	971	2,180	546
Other long-term assets	40	554	19		
Intangible Assets:					
Developed technology	5,010	39,200	20,200	14,400	2,200
Trade name	5,300	36,100	100	2,700	3,000
Customer relationships	14,400	101,600	600	41,000	9,100
Non-compete agreements	-	200	-	2,400	322
Goodwill	28,408	134,074	91,658	56,349	5.518
Total assets acquired	65,163	333,371	114,754	128,634	21,958
Liabilities	2,166	11,644	1,965	3,007	887
Deferred income taxes, net	2,875	21,674	(438)	22,478	2,310
Net assets	$ 60,122	$ 300,053	$ 113,327	$ 103,149	$ 18,761
Less fair-value of previous investment	-	-	18,300	-	-
Net assets acquired	60,122	300,053	94,927	103,149	18,761
Cash paid, net of cash acquired	$ 60,122	$ 300,053	$ 59,927	$ 103,149	$ 6,031
Contingent consideration payable	-	-	35,000	-	12,730
Net purchase price	$ 60,122	$ 300,053	$ 94,927	$ 103,149	$ 18,761

Tangible assets acquired, net of liabilities assumed, were stated at fair value at the date of acquisition based on management's assessment. The purchase price allocated to developed technology, trade names, non-compete agreements and customer relationships was based on management's forecasted cash inflows and outflows and using a relief-from-royalty and a multi-period excess earnings method to calculate the fair value of assets purchased. The developed technology is being amortized with the expense reflected in cost of goods sold in the Consolidated Statement of Earnings and Comprehensive Income. Amortization expense related to trade names, the non-compete agreement and customer relationships is reflected in selling, general and administrative expenses in the Consolidated Statement of Earnings and Comprehensive Income. The deferred income tax liability represents the estimated future impact of adjustments for the cost to be recognized upon the sale of acquired inventory that was written up to fair value and intangible asset amortization, of which are not deductible for income tax purposes, and the future tax benefit of net operating loss and tax credit carryforwards which will be deductible by the Company in future periods.

The Company's Condensed Consolidated Financial Statements include the following from the above acquisitions:

	Novus	*Protein- Simple*	*CyVek*
Net sales	$ 21,092	$ 65,512	$ 735
Net income (loss)	(610)	(3,624)	(4,196)
Amortization expense	1,898	11,364	981
Costs recognized on sale of acquired inventory	1,946	1,444	64

The unaudited pro forma financial information below summarizes the combined results of operations for Bio-Techne and the above acquisitions as though the companies were combined as of the beginning fiscal 2014. The pro forma financial information for all periods presented includes the purchase accounting effects resulting from these acquisitions. The pro forma financial information as presented below is for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisitions had taken place at the beginning of fiscal 2014.

	For the Year Ended June, 30	
	2015	*2014*
Net sales	$ 457,270	$ 433,034
Net income	104,132	100,958

See Note 15. Subsequent Events. for information regarding the Company's acquisition of Cliniqa Corporation in July 2015.

Note 3. Available-For-Sale Investments:

At June 30, 2015 and 2014, the amortized cost and market value of the Company's available-for-sale securities by major security type were as follows (in thousands):

	June 30,			
	2015		*2014*	
	Cost	*Market*	*Cost*	*Market*
State and municipal debt securities	$ 0	$ 0	$ 3,525	$ 3,525
Corporate debt securities	0	0	100	100
Certificates of deposit	4,089	4,089	7,639	7,639
Equity securities	29,472	52,300	29,472	37,097
	$ 33,561	56,389	$ 40,736	$ 48,361

At June 30, 2015 and 2014, all of the Company's available-for-sale debt securities were valued using Level 2 inputs, while its equity securities were valued using Level 1 inputs. Certificates of deposit are carried at cost and are not subject to the fair value hierarchy. There were no transfers between Level 1 and Level 2 securities during fiscal 2015. Gross unrealized gains on available-for-sale investments were $22.8 million and $7.6 million at June 30, 2015, and June 30, 2014, respectively.

The Company's investment in equity securities consists of investments in the common stock and warrants of ChemoCentryx, Inc. (CCXI). The warrants are to purchase 150,000 shares of CCXI common stock at $20 per share and expire in February, 2022. The fair value of the warrants as of June 30, 2015 and 2014 were $52.3 million and $37.1 million, respectively, and were valued using Level 2 inputs. At June 30, 2015, the Company holds an approximate 14% interest in CCXI.

Proceeds from maturities or sales of available-for-sale securities were $13.5 million, $289 million, and $104 million during fiscal 2015, 2014, and 2013, respectively. There were no material realized gains or losses on these sales. Realized gains and losses are determined on the specific identification method.

Note 4. Inventories:

Inventories consist of (in thousands):

	June 30, 2015	2014
Raw materials	$ 15,892	$ 9,852
Finished goods	33,685	28,995
	$ 49,577	$ 38,847

At June 30, 2015 and 2014, the Company had $24.0 million and $30.3 million, respectively, of excess protein, antibody and chemically-based inventory on hand which was not valued.

Note 5. Property and Equipment:

Property and equipment consist of (in thousands):

	June 30, 2015	2014
Cost:		
Land	$ 7,370	$ 7,468
Buildings and improvements	156,965	149,442
Machinery, equipment and other	74,385	53,067
	238,720	209,977
Accumulated depreciation and amortization	(108,967)	(92,857)
	$ 129,749	$ 117,120

Note 6. Intangible Assets and Goodwill:

Intangible assets and goodwill consist of (in thousands):

	Useful Life (years)	June 30, 2015	2014
Developed technology	8 - 15	$ 108,887	$ 48,166
Trade names	5 - 20	63,867	24,280
Customer relationships	8 - 16	167,494	59,240
Non-compete agreement	3 - 5	3,298	3,109
		343,546	134,795
Accumulated amortization		(50,707)	(26,019)
		$ 292,839	$ 108,776
Goodwill		$ 390,638	$ 151,473

Changes to the carrying amount of goodwill consists of (in thousands):

	Year Ended June 30, 2015	2014
Beginning balance	$ 151,473	$ 84,336
Acquisitions	254,140	61,867
Currency translation	(14,975)	5,270
Ending balance	$ 390,638	$ 151,473

Changes to the carrying amount of net intangible assets consists of (in thousands):

	Year Ended June 30, 2015	2014
Beginning balance	$ 108,776	$ 40,552
Acquisitions	222,710	75,122
Amortization expense	(26,170)	(10,267)
Currency translation	(12,777)	(3,369)
Ending balance	$ 292,839	$ 108,776

Amortization expense related to technologies included in cost of sales was $9.5 million, $4.2 million, and $3.0 million in fiscal 2015, 2014, and 2013, respectively. Amortization expense related to trade names, customer relationships, and the non-compete agreement included in selling, general and administrative expense was $16.7 million, $6.1 million, and $2.1 million in fiscal 2015, 2014, and 2013, respectively.

The estimated future amortization expense for intangible assets as of June 30, 2015 is as follows (in thousands):

Year Ending June 30:	
2016	28,416
2017	27,532
2018	27,335
2019	26,721
2020	26,401
Thereafter	156,434
	$ 292,839

Note 7. Debt and Other Financing Arrangements:

On July 28, 2014, the Company entered into a revolving line-of-credit facility governed by a Credit Agreement (the Credit Agreement). The Credit Agreement provides for a revolving credit facility of $150 million, which can be increased by an additional $150 million subject to certain conditions. Borrowings under the Credit Agreement may be used for working capital and expenditures of the Company and its subsidiaries, including financing permitted acquisitions. Borrowings under the Credit Agreement for base rate loans bear interest at a variable rate equal to the greater of (i) the prime commercial rate, (ii) the per annum federal funds rate plus 0.5%, or (iii) LIBOR + 1.00% - 1.75% depending on the existing total leverage ratio of Debt to Earnings Before Interest, Taxes, Depreciation and Amortization (as defined in the Credit Agreement). The annualized fee for any unused portion of the credit facility is 15 basis points.

The Credit Agreement matures on July 31, 2019 and contains customary restrictive and financial covenants and customary events of default. As of June 30, 2015, the outstanding balance under the Credit Agreement was $73 million.

Note 8. Commitments and Contingencies:

The Company leases office and warehouse space, vehicles and various office equipment under operating leases. At June 30, 2015, aggregate net minimum rental commitments under non-cancelable leases having an initial or remaining term of more than one year are payable as follows (in thousands):

Year Ending June 30:	
2016	5,289
2017	5,463
2018	4,964
2019	4,270
2020	4,212
Thereafter	22,490
	$ 46,688

Total rent expense was approximately $4.9 million, $1.6 million, and $0.7 million for the years ended June 30, 2015, 2014, and 2013, respectively.

The Company is routinely subject to claims and involved in legal actions which are incidental to the business of the Company. Although it is difficult to predict the ultimate outcome of these matters, management believes that any ultimate liability will not materially affect the consolidated financial position or results of operations of the Company.

Note 9. Share-based Compensation and Other Benefit Plans:

Equity incentive plan: The Company's 2010 Equity Incentive Plan (the 2010 Plan) provides for the granting of incentive and nonqualified stock options, restricted stock, restricted stock units, performance shares, performance units and stock appreciation rights. There are 3.0 million shares of common stock authorized for grant under the 2010 Plan. At June 30, 2015, there were 1.8 million shares of common stock available for grant under the 2010 Plan. The maximum term of incentive options granted under the 2010 Plan is ten years. The 2010 Plan replaced the Company's 1998 Nonqualified Stock Option Plan (the 1998 Plan) and 1997 Incentive Stock Option Plan (the 1997 Plan). The 2010 Plan, the 1998 Plan and the 1997 Plan (collectively, the Plans) are administered by the Board of Directors and its Compensation Committee, which determine the persons who are to receive awards under the Plans, the number of shares subject to each award and the term and exercise price of each award. The number of shares of common stock subject to outstanding awards at June 30, 2015 under the 2010 Plan, the 1998 Plan and the 1997 Plan were 1.1 million, 98,000, and 9,000, respectively.

Stock option activity under the Plans for the three years ended June 30, 2015, consists of the following (shares in thousands):

	Shares	*Weighted Average Exercise Price*	*Weighted Avg. Contractual Life (Yrs.)*	*Aggregate Intrinsic Value*
Outstanding at June 30, 2012	575	$ 65.78		
Granted	175	67.80		
Exercised	(22)	51.17		
Outstanding at June 30, 2013	728	66.70		
Granted	251	80.88		
Forfeited	(26)	76.23		
Exercised	(142)	59.07		
Outstanding at June 30, 2014	811	72.11		
Granted	600	93.98		
Forfeited	(133)	92.85		
Exercised	(141)	69.31		
Outstanding at June 30, 2015	1,137	$ 81.57	5.4	$19.2 million
Exercisable at June 30:				
2013	497	$ 65.04		
2014	534	69.49		
2015	547	72.72	5.0	$14.1 million

The fair values of options granted under the Plans were estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions used:

	Year Ended June 30,		
	2015	*2014*	*2013*
Dividend yield	1.3%	1.5%	1.8%
Expected volatility	18% - 21%	18% - 22%	18% - 23%
Risk-free interest rates	1.3% - 2.2%	1.4% - 2.1%	0.4% - 1.4%
Expected lives (years)	5	6	5

The dividend yield is based on the Company's historical annual cash dividend divided by the market value of the Company's common stock. The expected annualized volatility is based on the Company's historical stock price over a period equivalent to the expected life of the option granted. The risk-free interest rate is based on U.S. Treasury constant maturity interest rates with a term consistent with the expected life of the options granted.

The weighted average fair value of options granted during fiscal 2015, 2014 and 2013 was $15.01, $14.77 and $9.72, respectively. The total intrinsic value of options exercised during fiscal 2015, 2014 and 2013 were $3.5 million, $3.7 million, and $0.4, respectively. The total fair value of options vested during fiscal 2015, 2014 and 2013 were $2.3 million, $2.2 million, and $1.5 million, respectively.

In fiscal 2015, 2014 and fiscal 2013, 9,000, 26,355 and 15,000 restricted common stock shares were granted at weighted average grant date fair values of $91.78, $86.60 and $67.46 per share, respectively. Non-vested restricted common stock shares at June 30, 2015, 2014 and 2013 were 19,102, 36,355 and 15,000, respectively.

In fiscal 2015 and 2014, 36,192 and 5,000 restricted stock units were granted at a weighted average grant date fair value of $94.13 and $86.25, respectively. The restricted stock units vest over a three year period. In fiscal 2015, 10,000 restricted stock units were forfeited.

Stock-based compensation cost of $5.9 million, $3.5 million, and $1.9 million was included in selling, general and administrative expense in fiscal 2015, 2014 and 2013, respectively. As of June 30, 2015, there was $7.9 million of unrecognized compensation cost related to non-vested stock options, non-vested restricted stock units and non-vested restricted stock which will be expensed in fiscal 2016 through 2019. The weighted average period over which the compensation cost is expected to be recognized is 1.2 years.

Employee stock purchase plan: In fiscal year 2015, the Company established the Bio-Techne Corporation 2014 Employee Stock Purchase Plan, which was approved by the Company's shareholders on October 30, 2014, and which is designed to comply with IRS provisions governing employee stock purchase plans. Two hundred thousand shares were allocated to the Plan. The initial participation period for the plan began March 1, 2015 and ended on August 31, 2015. The Company recorded $39,000 expense for the plan in fiscal year 2015.

Profit sharing and savings plans: The Company has profit sharing and savings plans for its U.S. employees, which conform to IRS provisions for 401(k) plans. The Company may makes matching contributions to the Plan. The Company has recorded an expense for contributions to the plans of $1.1 million and $0.7 million for the years ended June 30, 2015, and 2014, respectively. No contribution was charged to operations for fiscal 2013. The Company operates defined contribution pension plans for its U.K. employees. The Company has recorded an expense for contributions to the plans of $0.7 million, $0.6 million, and $0.6 million for the years ended June 30, 2015, 2014 and 2013, respectively.

Performance incentive programs: In fiscal 2015, under certain employment agreements and a Management Incentive Plan available to executives officers and certain management personnel, the Company recorded cash bonuses of $1.9 million and granted options for 322,000 shares of common stock and issued 11,129 restricted stock units. The Company recorded cash bonuses of $0.9 and $0.3 million and granted options for 216,000 and 132,852 shares of common stock for the years ended June 30, 2014 and 2013, respectively. In addition, 5,000 restricted stock units and 17,855 shares of restricted common stock were issued in fiscal 2014 and 15,000 restricted common stock shares were issued to an executive officer in fiscal 2013.

Note 10. Income Taxes:

The provisions for income taxes consist of the following (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Earnings before income taxes consist of:			
Domestic	$ 121,765	$ 127,681	$ 127,491
Foreign	32,397	33,711	33,171
	$ 154,162	$ 161,392	$ 160,662
Taxes on income consist of:			
Currently payable:			
Federal	$ 28,220	$ 40,967	$ 37,666
State	6,165	1,709	2,012
Foreign	10,704	10,668	10,758
Net deferred:			
Federal	4,401	(1,137)	(595)
State	292	(41)	(7)
Foreign	(3,355)	(1,722)	(1,733)
	$ 46,427	$ 50,444	$ 48,101

The following is a reconciliation of the federal tax calculated at the statutory rate of 35% to the actual income taxes provided (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*
Computed expected federal income tax expense	$ 53,957	$ 56,487	$ 56,232
State income taxes, net of federal benefit	4,762	1,048	1,300
Qualified production activity deduction	(3,140)	(3,823)	(3,774)
Non-taxable gain on investment	(2,905)	0	0
Research and development tax credit	(912)	(476)	(1,392)
Tax-exempt interest	0	(654)	(568)
Foreign tax rate differences	(4,059)	(2,857)	(2,587)
Other	(1,276)	719	(1,110)
	$ 46,427	$ 50,444	$ 48,101

In the year ended June 30, 2015, as a result of the recent acquisitions, the rate reflects an increase for state tax expense as well as a resulting provision to return true up from fiscal 2014. This increase is offset by the non-taxable gain which was a result of purchasing the remaining interest in CyVek. In addition the Company‘s R&D Europe subsidiary declared and paid a dividend of £46.6 million which resulted in a tax benefit of approximately $1.7 million.

Temporary differences comprising deferred taxes on the Consolidated Balance Sheets are as follows (in thousands):

	June 30	
	2015	*2014*
Inventory	$ 8,753	$ 9,932
Net operating loss carryovers	34,767	0
Tax credit carryovers	3,872	0
Excess tax basis in equity investments	4,496	4,344
Deferred compensation	3,747	3,295
Other	4,712	3,088
Valuation allowance	(2,558)	(1,806)
Net deferred tax assets	57,789	18,853
Net unrealized gain on available-for-sale investments	(8,446)	(2,745)
Goodwill and intangible asset amortization	(96,401)	(37,641)
Depreciation	(2,394)	(2,166)
Other	(466)	(516)
Deferred tax liabilities	(107,707)	(43,068)
Net deferred tax liabilities	$ (49,918)	$ (24,215)

A deferred tax valuation allowance is required when it is more likely than not that all or a portion of deferred tax assets will not be realized. At June 30, 2015, a valuation allowance for potential capital loss carryovers on equity investments was zero as a result of improved performance of available-for-sale investments. Approximately $2.4 million of the valuation allowance at June 30, 2015 is for certain foreign and state tax net operating loss and state credit carryforwards that existed at the date the Company acquired Novus, ProteinSimple, and CyVek. The remainder of the valuation allowance is for certain state tax credit carryovers generated in fiscal 2015. The Company believes it is more likely than not that these tax carryovers will not be realized. At June 30, 2014, the Company had provided a valuation allowance for potential capital loss carryovers resulting from excess tax basis in certain of its equity investments. The Company believes that it is more likely than not that the results of future operations will generate sufficient taxable income to realize the remaining deferred tax assets.

At June 30, 2015, the Company has federal and state net operating loss carryforwards of approximately $86.3 million and $77.8 million, respectively, from its fiscal 2015 acquisitions of ProteinSimple and CyVek, which are not limited under IRC Section 382. At June 30, 2015, the company has foreign net operating loss carryforwards of $2.5 million from its fiscal 2015 acquisition of Novus. The net operating loss carryforwards expire between fiscal 2016 and 2034. The Company has a deferred tax asset of $32.6 million, net of the valuation allowance discussed above, related to the net operating loss carryovers. At June 30, 2015, the Company has federal and state tax credit carryforwards of $2.5 million and $1.3 million, respectively. The federal tax credit carryforwards expire between 2018 and 2035. The state credit carryforwards have no expiry date. The Company has a deferred tax asset of $3.5 million, net of the valuation allowance discussed above, related to the tax credit carryovers.

The Company has not recognized a deferred tax liability for unremitted earnings of approximately $43.0 million from its foreign operations because its subsidiaries have invested or will invest the undistributed earnings indefinitely, or the earnings will be remitted in a tax-neutral transaction.

The Company's unrecognized tax benefits at June 30, 2015, 2014 and 2013, including accrued interest and penalties, were not material. The Company does not believe it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase in the next twelve months. The Company files income tax returns in the U.S federal and certain state tax jurisdictions, and several jurisdictions outside the U.S. The Company's federal returns are subject to tax assessment for 2012 and subsequent years. State and foreign income tax returns are generally subject to examination for a period of three to five years after filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states.

Note 11. Earnings Per Share:

The number of shares used to calculate earnings per share are as follows (in thousands, except per share data):

	Year Ended June 30,		
	2015	*2014*	*2013*
Net earnings used for basic and diluted earnings per share	$ 107,735	$ 110,948	$ 112,561
Weighted average shares used in basic computation	37,096	36,890	36,836
Dilutive stock options	135	115	64
Weighted average shares used in diluted computation	37,231	37,005	36,900
Basic EPS	$ 2.90	$ 3.01	$ 3.06
Diluted EPS	$ 2.89	$ 3.00	$ 3.05

The dilutive effect of stock options in the above table excludes all options for which the aggregate exercise proceeds exceeded the average market price for the period. The number of potentially dilutive option shares excluded from the calculation was 516,000, 196,000, and 329,000 at June 30, 2015, 2014 and 2013, respectively.

Note 12. Segment Information:

The Company has three reportable segments based on the nature of its products; they are Biotechnology, Clinical Controls, and Protein Platforms.

The Company's Biotechnology reporting segment develops, manufactures and sells biotechnology research and diagnostic products world-wide. No customer in the Biotechnology segment accounted for more than 10% of the segments net sales for the years ended June 30, 2015, 2014 and 2013.

The Company's Clinical Controls reporting segment develops and manufactures controls and calibrators for sale world-wide. One customer accounted for approximately 13% and 14% of Clinical Controls' net sales during fiscal 2015 and 2014 respectively. No single customer accounted for more than 10% of Clinical Controls' net sales in fiscal 2013.

The Company's Protein Platforms segment develops and commercializes proprietary systems and consumables for protein analysis. This segment was formed from the fiscal 2015 acquisitions of ProteinSimple and CyVek. No customer in the Protein Platforms segment accounted for more than 10% of the segments net sales for the years ended June 30, 2015.

There are no concentrations of business transacted with a particular customer or supplier or concentrations of revenue from a particular product or geographic area that would severely impact the Company in the near term.

Following is financial information relating to the operating segments (in thousands):

	Year Ended June 30,		
	2015	*2014*	*2013*

Consolidated capital purchases	$ 19,905	$ 13,821	$ 22,454

The other reconciling items include the results of unallocated corporate expenses and the Company's share of gain (losses) from its equity method investees.

Following is financial information relating to geographic areas (in thousands):

	Year Ended June 30,		
	2015	2014	2013
External sales			
United States	$ 245,217	$ 190,359	$ 164,308
Europe	134,077	97,157	88,297
China	26,105	18,878	14,106
Other Asia	23,806	32,704	28,608
Rest of world	23,041	18,665	15,256
Total external sales	$ 452,246	$ 357,763	$ 310,575
Long-lived assets			
United States and Canada	$ 119,075	$ 109,790	$ 103,541
Europe	11,239	8,340	7,129
China	1,286	678	117
Total long-lived assets	$ 131,600	$ 118,808	$ 110,787

External sales are attributed to countries based on the location of the customer or distributor. Long-lived assets are comprised of land, buildings and improvements and equipment, net of accumulated depreciation and other assets.

Note 13. Supplemental Disclosures of Cash Flow Information and Noncash Investing and Financing Activities:

In fiscal 2015, the Company acquired Novus, ProteinSimple, and CyVek for approximately $60 million, $300 million and $95 million, respectively. CyVek was acquired for approximately $62 million in cash and the Company will also pay CyVek's previous stockholders up to $35.0 million based on the revenue generated by CyVek's products before May 3, 2017 (30 months from the closing of the Merger).

In fiscal 2015, the Company opened a line of credit from which it borrowed a net amount of $73 million.

In fiscal 2014, the Company acquired Bionostics for approximately $103 million. PrimeGene was acquired for approximately $18.7 million. Approximately $6.0 million was paid at closing with approximately $12.7 million payable over fiscal years 2015 through 2017.

In fiscal 2015, 2014 and 2013, the Company paid cash for income taxes of $42.6 million, $55.2 million and $51.6 million, respectively.

In fiscal 2015, stock options for 385 shares of common stock were exercised by the surrender of 309 shares of common stock at fair market value of $31,000. In fiscal 2014, stock options for 1,077 shares of common stock were exercised by the surrender of 733 shares of common stock at fair market value of $56,000.

Note 14. Accumulated Other Comprehensive Income:

Changes in accumulated other comprehensive income (loss), net of tax, for the year ended June 30, 2015 consists of (in thousands):

	Unrealized Gains (Losses) on Available-for-Sale Investments	Foreign Currency Translation Adjustments	Total
Beginning balance	$ 3,074	$ (8,462)	$ (5,388)
Other comprehensive income	11,308	(36,513)	(25,205)
Ending balance	$ 14,382	(44,975)	$ (30,593)

Note 15. Subsequent Events:

On July 8, 2015, the Company acquired all of the outstanding equity of Cliniqa Corporation. Cliniqa, based in San Marcos, California, specializes in the manufacturing and commercialization of quality controls and calibrators as well as bulk reagents used in the clinical diagnostic market. Its controls and reagents are used in a wide variety of diagnostic tests for such pathologies as cardiac disease, diabetes, cancer, immunological disorders, therapeutic drug monitoring, urine analysis and toxicology. The acquisition further expanded and complemented our clinical controls product lines.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Bio-Techne Corporation:

We have audited the accompanying consolidated balance sheets of Bio-Techne Corporation and subsidiaries (the Company) as of June 30, 2015 and 2014, and the related consolidated statements of earnings and comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended June 30, 2015. We also have audited the Company's internal control over financial reporting as of June 30, 2015, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Controls over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Bio-Techne Corporation and subsidiaries as of June 30, 2015 and 2014, and the results of its operations and its cash flows for each of the years in the three-year period ended June 30, 2015, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Bio-Techne Corporation maintained, in all material respects, effective internal control over financial reporting as of June 30, 2015, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

During the year ended June 30, 2015, the Company acquired Protein Platforms and Novus. Management excluded from its assessment of the effectiveness of internal control over financial reporting as of June 30, 2015, Protein Platforms and Novus' internal control over financial reporting that comprise 47.9 % of total assets and 18.7% of total revenues included in the consolidated financial statements of Bio-Techne Corporation and subsidiaries as of and for the year ended June 30, 2015. Our audit of internal control over financial reporting of Bio-Techne Corporation also excluded an evaluation of the internal control over financial reporting of Protein Platforms and Novus.

(signed) KPMG LLP

Minneapolis, Minnesota
August 31, 2015

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) of the Securities Exchange Act of 1934 (the "Exchange Act"), management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated, as of the end of the period covered by this report, the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2015.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management, including our Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of June 30, 2015. In making this assessment, our management used the criteria for effective internal control over financial reporting described in "Internal Control—Integrated Framework (1992)" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that our internal control over financial reporting was effective as of June 30, 2015.

The Company's internal control over financial reporting as of June 30, 2015 has been audited by KPMG LLP, as stated in their report which is included elsewhere herein.

Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

As previously announced, we acquired Novus on July 2, 2014, ProtienSimple on July 31, 2014, and CyVek on November 3, 2014. Novus, ProteinSimple, and CyVek accounted for approximately $21 million, $66 million, and $1 million of fiscal 2015 consolidated net sales. We have not fully evaluated any changes in internal control over financial reporting associated with these acquisitions. Therefore, management's assessment of internal control over financial reporting as of June 30, 2015 excluded a portion of internal control over financial reporting related to these acquisitions. We intend to disclose all material changes resulting from these acquisitions within or prior to the time of our first annual assessment of internal control over financial reporting that is required to include these entities.

The results reported in this quarterly report include those of Novus, ProteinSimple, and CyVek.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Other than “Executive Officers of the Registrant” which is set forth at the end of Item 1 in Part I of this report, the information required by Item 10 is incorporated herein by reference to the sections entitled "Election of Directors," "Additional Corporate Governance Matters" and "Principal Shareholders" in the Company’s Proxy Statement for its 2015 Annual Meeting of Shareholders which will be filed with the Securities and Exchange Commission pursuant to Regulation 14A within 120 days after the close of the fiscal year for which this report is filed.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Item 11 is incorporated herein by reference to the sections entitled “Election of Directors” and "Executive Compensation" in the Company’s Proxy Statement for its 2015 Annual Meeting of Shareholders which will be filed with the Securities and Exchange Commission pursuant to Regulation 14A within 120 days after the close of the fiscal year for which this report is filed.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

Information about the Company’s equity compensation plans at June 30, 2015 is as follows:

Exhibit 23

Consent of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Bio-Techne Corporation:

We consent to the incorporation by reference in the registration statement (No. 333-37263, 333-88885, 333-49962, 333-170576, and 333-199847) on Form S-8 of Bio-Techne Corporation of our report dated August 31, 2015, with respect to the consolidated balance sheets of Bio-Techne Corporation as of June 30, 2015 and 2014, and the related consolidated statements of earnings and comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended June 30, 2015, and all related financial statement schedules, and the effectiveness of internal control over financial reporting as of June 30, 2015, which report appears in the June 30, 2015 annual report on Form 10-K of Bio-Techne Corporation.

Our report dated August 31, 2015 on internal control over financial reporting as of June 30, 2015, contains an explanatory paragraph that states management excluded from its assessment of the effectiveness of internal control over financial reporting as of June 30, 2015, Protein Platforms and Novus' internal control over financial reporting that comprise 47.9% of total assets and 18.7% of total revenues included in the consolidated financial statements of Bio-Techne Corporation as of and for the year ended June 30, 2015. Our audit of internal control over financial reporting of Bio-Techne Corporation also excluded an evaluation of the internal control over financial reporting of Protein Platforms and Novus.

CERTIFICATION

I, Charles Kummeth, certify that:

1. I have reviewed this annual report on Form 10-K of Bio-Techne Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report.

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f) and 15d-15(f)) for the registrant and have:

    a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

    b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

    c. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

    d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):

    a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

    b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
