NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
Bio-Techne Corporation and Subsidiaries  
(unaudited)

Note 1. Basis of Presentation and Summary of Significant Accounting Policies:  
The interim condensed consolidated financial statements of Bio-Techne Corporation and subsidiaries, (the Company) presented here have been prepared by the Company and are unaudited. They have been prepared in accordance with accounting principles generally accepted in the United States of America and with instructions to Form 10-Q and Article 10 of Regulation S-X. They reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature.  

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These interim unaudited condensed consolidated financial statements should be read in conjunction with the Company's Consolidated Financial Statements and Notes thereto for the fiscal year ended June 30, 2019, included in the Company's Annual Report on Form 10-K/A for fiscal year 2019. The Company's condensed consolidated Balance Sheet as of June 30, 2019 was derived from the audited annual Consolidated Financial Statements for fiscal year2019. Refer to the Company's Annual Report on Form 10-K/A for fiscal year2019 for the notes to the June 30, 2019 Balance Sheet and a summary of significant accounting policies followed by the Company. The Company follows these policies in preparation of the interim unaudited condensed consolidated financial statements.

During fiscal year 2020, the Company operated under two operating segments, Protein Sciences and Diagnostics and Genomics. The operating segments the company operated under were consistent with the Company's reportable segments disclosed in the Company's Annual Report on Form 10-K/A for fiscal2019.

Recently Adopted Accounting Pronouncements  
In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which amends the existing guidance to require lessees to recognize lease assets and lease liabilities from operating leases on the balance sheet. The FASB has issued narrow codification improvements to Leases (Topic 842) through ASU No. 2018-10 and ASU 2019-01. Additionally, the FASB issued ASU 2018-11, allowing an entity to elect a transition method where they do not restate prior periods presented in the financial statements in the period of adoption. The Company has elected the transition method allowed for under ASU 2018-11 when adopting Leases (Topic 842). The Company adopted the standard effective July 1, 2019 and correspondingly recorded incremental operating lease liabilities of $80.6 million, a right-of-use lease asset of $79.5 million, retained earnings of $0.8 million and a deferred tax adjustment of $0.3 million. Additionally, the Company reclassified $4.0 million of deferred rent recorded within accrued expenses under ASC 840 - Leases into operating lease liabilities upon adoption of Topic842. In adopting ASC 842, the Company elected the package of available practical expedients and to use hindsight in determining the lease term for all existing leases. Further, as part of our adoption of ASC 842, the Company also made the accounting policy elections to not capitalize short term leases (defined as a lease with a lease term that is less than12 months) and to combine lease and non-lease components for all asset classes in determining the lease payments. Refer to Note 7 for additional information on leases.

Pronouncements Issued But Not Yet Adopted  
In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments. The amendment in this update replaced the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses on instruments within its scope, including trade and loan receivables and available-for-sale debt securities. This update is intended to provide financial statement users with more decision-useful information about the expected credit losses. This ASU is effective for annual periods and interim periods for those annual periods beginning after December 15, 2019, which for us is July 1, 2020. Entities may early adopt after December 15, 2018. We are currently evaluating the impact of the adoption of ASU 2016-13 on our consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-15, Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract. The standard aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The accounting for the service element of a hosting arrangement that is a service contract is not affected by the new standard. This ASU is effective for annual periods and interim periods for those annual periods beginning afterDecember 15, 2019, which for us is July 1, 2020 and may be adopted retrospectively or prospectively to eligible costs incurred on or after the date the guidance is first applied. We are currently evaluating the impact of the adoption of ASU 2018-15 on our consolidated financial statements and anticipate that we will adopt the standard prospectively.

Table of Contents

Note 2. Revenue Recognition:  
Consumables revenues consist of single-use products and are recognized at a point in time following the transfer of control of such products to the customer, which generally occurs upon shipment. Instruments revenues typically consist of longer-lived assets that, for the substantial majority of sales, are recognized at a point in time in a manner similar to consumables. The vast majority of service revenues consist of extended warranty contracts, post contract support ("PCS"), and custom development projects that are recognized over time as either the customers receive and consume the benefits of such services simultaneously or the underlying asset being developed has no alternative use for the Company at contract inception and the Company has an enforceable right to payment for the portion of the performance completed. The remaining service revenues were not material to the period and consist of laboratory services recognized at point in time. Given the Company does not have significant historical experience
collecting payments from Medicare or insurance providers, the Company considered the variable consideration for such services to be constrained as it would not be probable that a significant amount of revenue would not need to be reversed in future periods for the services provided. Accordingly, the Company did not record revenue upon completion of the performance obligation, but rather upon cash receipt, which was subsequent to the performance obligation being satisfied. Royalty revenues are primarily based on net sales of the Company’s licensed products by a third party. We recognize royalty revenues in the period the sales occur using third party evidence. The Company elected the "right to invoice" practical expedient based on the Company's right to invoice a customer at an amount that approximates the value to the customer and the performance completed to date.

The Company elected the exemption to not disclose the unfulfilled performance obligations for contracts with an original length of one year or less and the exemption to exclude future performance obligations that are accounted under the sales-based or usage-based royalty guidance. The Company's unfulfilled performance obligations were not material as of December 31, 2019.

Contracts with customers that contain instruments may include multiple performance obligations. For these contracts, the Company allocates the contract’s transaction price to each performance obligation on a relative standalone selling price basis. Allocation of the transaction price is determined at the contracts’ inception.

Payment terms for shipments to end-users are generally net 30 days. Payment terms for distributor shipments may range from 30 to 90 days. Service arrangements commonly call for payments in advance of performing the work (e.g. extended warranty and service contracts), upon completion of the service (e.g. custom development manufacturing) or a mix of both.

Contract assets include revenues recognized in advance of billings. Contract assets are included within other current assets in the accompanying balance sheet as the amount of time expected to lapse until the company's right to consideration becomes unconditional is less than one year. We elected the practical expedient allowing us to expense contract costs that would otherwise be capitalized and amortized over a period of less than one year. Contract assets as of December 31, 2019 are not material.

Contract liabilities include billings in excess of revenues recognized, such as those resulting from customer advances and deposits and unearned revenue on warranty contracts. Contract liabilities as of December 31, 2019 and June 30, 2019 were approximately $13.2 million and $10.4 million, respectively. Contract liabilities as of June 30, 2019 subsequently recognized as revenue during the quarter period and six month period ended December 31, 2019 were approximately $2.2 million and $6.0 million, respectively. Contract liabilities in excess of one year are included in Other long-term liabilities on the balance sheet.
Any claims for credit or return of goods must be made within 10 days of receipt. Revenues are reduced to reflect estimated credits and returns. Although the amounts recorded for these revenue deductions are dependent on estimates and assumptions, historically our adjustments to actual results have not been material.

Taxes collected from customers relating to product sales and remitted to governmental authorities are excluded from revenue. Amounts billed to customers for shipping and handling are included in revenue, while the related shipping and handling costs are reflected in cost of products. We elected the practical expedient that allows us to account for shipping and handling activities that occur after the customer has obtained control of a good as a fulfillment cost, and we accrue costs of shipping and handling when the related revenue is recognized.

The following tables present our disaggregated revenue for the periods presented.

</table>

We evaluate the carrying value of goodwill in the fourth quarter of each fiscal year and between annual evaluations if events occur or circumstances change that would indicate a possible impairment. The Company performed a goodwill impairment assessment for all of its reporting units during the fourth quarter of fiscal 2019. No indicators of impairment were identified as part of our assessment.

No triggering events were identified during the six months ended December 31, 2019. There has been no impairment of goodwill since the adoption of Financial Accounting Standards Board (“FASB”) ASC 350 guidance for goodwill and other intangibles on July 1, 2002.

Note 4. Acquisitions:

We periodically complete business combinations that align with our business strategy. Acquisitions are accounted for using the acquisition method of accounting, which requires, among other things, that assets acquired and liabilities assumed be recognized at fair value as of the acquisition date and the results of operations of each acquired business are included in our consolidated statements of comprehensive income from their respective dates of acquisition. Acquisition costs are recorded in selling, general and administrative expenses as incurred.

B-MoGen Biotechnologies

On June 4, 2019, the Company acquired the remaining interest in B-MoGen Biotechnologies Inc. (B-MoGen) for approximately $17.4 million, net of cash acquired, plus contingent consideration of up to $38.0 million, subject to certain product development milestones and revenue thresholds. The Company previously held an investment of $1.4 million in B-MoGen and recognized a gain of approximately $3.7 million on the date of the transaction representing the adjustment of our historical investment to its fair value as previously disclosed in our 10K/A. The goodwill recorded as result of the acquisition represents the strategic benefits of growing the Company’s product portfolio and the expected revenue growth from increased market penetration. The goodwill is not deductible for income tax purposes. The business became part of the Protein Sciences reportable segment in the fourth quarter of fiscal year 2019.

Certain estimated fair values are not yet finalized and are subject to change, which could be significant. The Company expects to finalize our purchasing accounting by the end of the third quarter of fiscal year 2020 when we have finalized our income tax assessment of acquired net operating losses (NOLs) with the completion of the stub period tax returns. Amounts for deferred tax liabilities, acquired NOLs, and goodwill remain subject to change. The preliminary estimated fair values of the assets acquired and liabilities assumed are as follows (in thousand's):

<table>

</tbody>
</table>
Tangible assets and liabilities acquired were recorded at fair value on the date of close based on management's assessment. The purchase price allocated to developed technology was estimated based on management's forecasted cash inflows and outflows and using a multi-period excess earnings method to calculate the fair value of assets purchased. The amount recorded for developed technology is being amortized with the expense reflected in cost of goods sold in the Condensed Consolidated Statement of Earnings and Comprehensive Income. The amortization period for developed technology is estimated to be 14 years. The net deferred income tax liability represents the net amount of the estimated future impact of adjustments for costs to be recognized as intangible asset amortization, which is not deductible for income tax purposes offset by the deferred tax asset for the preliminary calculation of acquired NOLs.

Note 5. Fair Value Measurements:

The Company's financial instruments include cash and cash equivalents, available for sale investments, derivative instruments, accounts receivable, accounts payable, contingent consideration obligations, and long-term debt.

Fair value is defined as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. This standard also establishes a hierarchy for inputs used in measuring fair value. This standard maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability based on market data obtained from independent sources. Unobservable inputs are inputs that reflect our assumptions about the factors market participants would use in valuing the asset or liability based upon the best information available in the circumstances.

The categorization of financial assets and liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable for the asset or liability and their fair values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 may also include certain investment securities for which there is limited market activity or a decrease in the observability of market pricing for the investments, such that the determination of fair value requires significant judgment or estimation.

The following tables provide information by level for financial assets and liabilities that are measured at fair value on a recurring basis (in thousands):

(1) Included in available-for-sale investments on the condensed consolidated balance sheet. The cost basis in the Company's investment in ChemoCentryx Inc (CCXI) was $11.3 million and $18.8 million as of December 31, 2019 and June 30, 2019, respectively. The Company has a warrant to purchase additional CCXI equity shares which was valued at $5.6 million as of December 31, 2019. The fair value of the warrant as of June 30, 2019 was not material.

(2) Included in available-for-sale investments on the condensed consolidated balance sheet. The certificate of deposits have contractual maturity dates within one year.

Fair value measurements of available for sale securities

Available for sale securities excluding warrants are measured at fair value using quoted market prices in active markets for identical assets and are therefore classified as Level 1 assets. The Company's warrant to purchase additional shares at a specified future price was valued using a Black-Scholes model with observable inputs in active markets and therefore was classified as a Level 2 asset.

Fair value measurements of derivative instruments

In October 2018, the Company entered into forward starting swaps designated as cash flow hedges on outstanding debt. The forward starting swaps reduce the variability of cash flow payments for the Company by converting the variable interest rate on the Company's long-term debt described in Note 6 to that of a fixed interest rate. Accordingly, as part of the forward starting swaps, the Company will exchange, at specified intervals, the difference between floating and fixed interest amounts based on $380 million of notional principal amount. The change in the fair value of the instrument is reported as a component of the other comprehensive income and reclassified into interest expense over the corresponding term of the cash flow hedge. As further described in Note 8, the company reclassified $0.8 million out of other comprehensive income into interest expense during the quarter and six months ended December 31, 2019. The liability related to the derivative instrument was recorded within Other long-term liabilities on the Consolidated Balance Sheet. The instrument was valued using observable market inputs in active markets and therefore classified as a Level 2 liability.
Fair value measurements of contingent consideration

In connection with the Exosome Diagnostics, Inc. (Exosome), QT Holdings Corporation (Quad), and B-MoGen acquisitions the Company is required to make contingent consideration payments of up to $325.0 million, $51.0 million and $38.0 million, respectively. The contingent consideration payments are subject to Exosome achieving certain EBITA thresholds, Quad meeting certain product development milestones and revenue thresholds, and B-MoGen meeting certain product development milestones and revenue thresholds. The preliminary fair value of the liabilities for the contingent payments recognized upon the acquisition as part of the purchase accounting opening balance sheet totaled $14.6 million ($3.8 million for Exosome, $5.3 million for Quad, and $5.5 million for B-MoGen). The preliminary fair value of the development milestone payments was estimated by discounting to present value the probability-weighted contingent payments expected to be made. Assumptions used in these calculations were probability of success, duration of the earn-out, and discount rate. The preliminary fair value for the EBITA and revenue milestone payments was determined using a Monte Carlo simulation based model discounted to present value. Assumptions used in these calculation included units sold, expected revenue, expected expenses, discount rate and various probability factors. The ultimate settlement of contingent consideration could deviate from current estimates based on the actual results of these financial measures. This liability is considered to be a Level 3 financial liability that is re-measured each reporting period. The change in fair value of contingent consideration for these acquisitions is included in general and administrative expense.

The following table presents a reconciliation of the liability measured at fair value on a recurring basis using significant unobservable inputs (LevelB) for the quarter and six months ended December 31, 2019 (in thousands):

</tbody>
</table>

The use of different assumptions, applying different judgment to matters that inherently are subjective and changes in future market conditions could result in different estimates of fair value of our securities or contingent consideration, currently and in the future. If market conditions deteriorate, we may incur impairment charges for securities in our investment portfolio. We may also incur changes to our contingent consideration liability as discussed below.

Fair value measurements of other financial instruments—The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate fair value.

Cash and cash equivalents, certificates of deposit, accounts receivable, and accounts payable – The carrying amounts reported in the consolidated balance sheets approximate fair value because of the short-term nature of these items.

Long-term debt – The carrying amounts reported in the consolidated balance sheets for the amount drawn on our line-of-credit facility approximates fair value because our interest rate is variable and reflects current market rates.

Note 6. Debt and Other Financing Arrangements:

On August 1, 2018, the Company entered into a new revolving line-of-credit and term loan governed by a Credit Agreement (the Credit Agreement). The Credit Agreement provides for a revolving credit facility of $600.0 million, which can be increased by an additional $200.0 million subject to certain conditions, and a term loan of $250.0 million. Borrowings under the Credit Agreement may be used for working capital and expenditures of the Company and its subsidiaries, including financing permitted acquisitions. Borrowings under the Credit Agreement bear interest at a variable rate. The current outstanding debt is based on the Eurodollar Loans term for which the interest rate is calculated as the sum of LIBOR plus an applicable margin. The applicable margin is determined from the total leverage ratio of the Company and updated on a quarterly basis. The annualized fee for any unused portion of the credit facility is currently 20 basis points.

The Credit Agreement matures on August 1, 2023 and contains customary restrictive and financial covenants and customary events of default. As of December 31, 2019, the outstanding balance under the Credit Agreement was $383.3 million.

Table of Contents

Note 7. Leases:

As a lessee, the company leases offices, labs, and manufacturing facilities, as well as vehicles, copiers, and other equipment. The Company adopted ASCNo. 2016-02 and related standards (collectively ASC 842, Leases), which replaced previous lease accounting guidance, on July 1, 2019. The Company recognizes operating lease expense on a straight-line basis over the lease term. Operating lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. The discount rate used to calculate present value is Bio-Techne’s incremental borrowing rate or, if available, the rate implicit in the lease. Bio-Techne determines the incremental borrowing rate for each lease based primarily on its lease term and the economic environment of the applicable country or region. During the quarter and six months ended December 31, 2019, the Company recognized $0.9 million and $1.9 million in variable lease expense, respectively, in the Condensed Consolidated Statements of Earnings and Comprehensive Income. During the quarter and six months ended December 31, 2019, the Company also recognized $3.1 million and $6.3 million, respectively relating to fixed lease expense in the Condensed Consolidated Statements of Earnings and Comprehensive Income. The following table summarizes the balance sheet classification of the Company’s operating leases, amounts of right of use assets and lease liabilities, the weighted average remaining lease term, and the weighted average discount rate for the Company’s operating leases (asset and liability amounts are in thousands):

<table>
<thead>

<td>$81,091</td>
</tr>
</tbody>
</table>

Certain leases include one or more options to renew, with terms that extend the lease term up to five years. Bio-Techne includes option to renew the lease as part of the right of use lease asset and liability when it is reasonably certain the Company will exercise the option. In addition, certain leases contain fair value purchase and termination options with an associated penalty. In general, Bio-Techne is not reasonably certain to exercise such options.

Disclosures related to periods prior to adoption of new lease standard:

At June 30, 2019, aggregate net minimum rental commitments under non-cancelable leases having an initial or remaining term of more than one year are payable as follows (in thousands):

<table>
<thead>
<tr>
<th>Operating Leases</th>
<th>2020</th>

The components of other comprehensive income (loss) consist of changes in foreign currency translation adjustments and changes in net unrealized gains (losses) on derivative instruments designated as cash flow hedges entered into in the second quarter of fiscal 2019. There were no reclassifications of gains (losses) from accumulated other comprehensive income (loss) to earnings during the six months ended December 31, 2019 and 2018.

The accumulated balances related to each component of other comprehensive income (loss), net of tax, are summarized as follows:

</tbody>
</table>

1. The gain (loss) on the interest rate swap will be reclassified into interest expense as payments on the derivative agreement are made. Approximately ($8,633) will be reclassified into earnings in the 12 months subsequent to December 2019.
2. As previously disclosed in our 10-K/A, unrealized gains of $24,682 on available-for-sale investments with readily determinable fair values were included in the June 30, 2018 Consolidated Balance Sheet and were reclassified into retained earnings at the beginning of fiscal 2019 upon our adoption of ASU 2016-01 and ASU 2018-02. The amounts presented in accumulated other comprehensive income as of June 30, 2018 exclude these unrealized gains subsequently reclassified into retained earnings.
3. The Company reclassified ($821) to interest expense and a related tax benefit tax of $92 during the six months ended December 31, 2019. The Company had deferred tax benefits of $2,640 and $1,216 included in the accumulated other comprehensive income loss as of December 31, 2019 and December 31, 2018, respectively.

</table>

The dilutive effect of stock options and restricted stock units in the above table excludes all options for which the aggregate exercise proceeds exceeded the average market price for the period. The number of potentially dilutive option shares excluded from the calculation was 1.3 million and 1.3 million for the quarter ended December 31, 2019 and 2018, respectively and 1.3 million and 1.3 million for the six months ended December 31, 2019 and 2018 respectively.

Note 10. Share-based Compensation:

During the six months ended December 31, 2019 and 2018, the Company granted 0.7 million and 0.9 million stock options at weighted average grant prices of $90.73 and $174.10 and weighted average fair values of $37.00 and $34.69, respectively. During the six months ended December 31, 2019 and 2018, the Company granted 30,858 and 53,903 restricted stock units at a weighted average fair value of $92.08 and $170.74, respectively. During the six months ended December 31, 2019 and 2018, the Company granted 15,398 and 14,887 shares of restricted common stock shares at a weighted average fair value of $93.48 and $125.05.

Stock options for 287,595 and 189,627 shares of common stock with total intrinsic values of $5.3 million and $16.3 million were exercised during the six months ended December 31, 2019 and 2018, respectively.

Stock-based compensation expense of $10.1 million and $6.9 million was included in selling, general and administrative expenses for the quarter ended December 31, 2019 and 2018, respectively. Stock-based compensation expense of $18.5 million and $18.4 million was included in selling, general, and administrative expenses for the six months ended December 31, 2019 and 2018, respectively. Additionally, the company recognized $0.5 million and $0.9 million in cost of goods sold in the quarter and six months ended December 31, 2019, respectively. As of December 31, 2019, there was $38.2 million of unrecognized compensation cost related to non-vested stock options, non-vested restricted stock units and non-vested restricted stock. The weighted average period over which the compensation cost is expected to be recognized is 2.1 years.
Note 11. Other Income / (Expense):

The components of other income (expense) in the accompanying Statement of Earnings and Comprehensive Income are as follows:

</tbody>
</table>

(1) The changes in other non-operating income (expense) were driven by changes in the fair value of our CCXI investment as further described in Note 5 above.

Table of Contents

Note 12. Income Taxes:

The Company’s effective income tax rate for the second quarter of fiscal 2020 and 2019 was 20.4% and 19.3% of consolidated earnings before income taxes, and 20.3% and 11.2% for the first six months of fiscal 2020 and 2019, respectively. The change in the company’s tax rate for the quarter and six months ended December 31, 2019 compared to the quarter and six months ended December 31, 2018 were driven by changes in the composition and amount of the Company’s taxable income in fiscal 2020 resulting from the gain on our CCXI investment and discrete tax items.

The Company recognized total net benefits related to discrete tax items of $5.4 million and $6.7 million during the quarter and six months ended December 31, 2019, respectively, compared to $1.1 million and $5.3 million during the quarter and six months ended December 31, 2018, respectively. Share-based compensation excess tax benefit contributed $3.7 million and $7.0 million in the quarter and six months ended December 31, 2019, respectively, compared to $0.3 million and $3.7 million in the quarter and six months, ended December 31, 2018, respectively. The Company recognized total other immaterial net discrete tax benefits of $1.7 million in the quarter ended December 31, 2019 and a net discrete tax expense of $0.3 million in the six months ended December 31, 2019 compared to $0.8 million and $1.6 million of other immaterial net discrete tax benefits in the quarter and six months ended December 31, 2018, respectively.

The Company continues to monitor changes in interpretations, assumptions guidance, and additional regulations regarding the Tax Cuts and Jobs Act (the “Tax Act”), which was enacted on December 22, 2017. The Company recognizes potential changes to these items could have a material impact on our effective tax rate in future periods.

Note 13. Segment Information:

The Company's management evaluates segment operating performance based on operating income before certain charges to cost of sales and selling, general and administrative expenses, principally associated with acquisition accounting related to inventory, amortization of acquisition-related intangible assets and other acquisition-related expenses. The Protein Sciences and Diagnostics and Genomics segments both include consumables, instruments, services and royalty revenue.

The following is financial information relating to the Company's reportable segments (in thousands):

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management discussion and analysis (“MD&A”) provides information that we believe is useful in understanding our operating results, cash flows and financial condition. We provide quantitative information about the material sales drivers including the effect of acquisitions and changes in foreign currency at the corporate and segment level. We also provide quantitative information about discrete tax items and other significant factors we believe are useful for understanding our results. The MD&A should be read in conjunction with both the unaudited consolidated financial information and related notes included in this Form 10-Q, and Management’s Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended June 30, 2019. This discussion contains various “Non-GAAP Financial Measures” and also contains various “Forward-Looking Statements” within the meaning of the Private Securities Litigation Reform Act of 1995. We refer readers to the statements entitled “Non-GAAP Financial Measures” and “Forward-Looking Information and Cautionary Statements” located at the
OVERVIEW

Bio-Techne and its subsidiaries, collectively doing business as Bio-Techne Corporation (Bio-Techne, we, our, us or the Company) develop, manufacture and sell biotechnology reagents, instruments and services for the research and clinical diagnostic markets worldwide. With our deep product portfolio and application expertise, we strive to provide the life sciences community with innovative, high-quality scientific tools to better understand biological processes and drive discovery of diagnostic and therapeutic products.

Consistent with above, we have operated with two segments – our Protein Sciences segment and our Diagnostics and Genomics segment during fiscal year 2020. Our Protein Sciences segment is a leading developer and manufacturer of high-quality purified proteins and reagent solutions, most notably cytokines and growth factors, antibodies, immunoassays, biologically active small molecule compounds, tissue culture reagents and T-Cell activation technologies. This segment also includes protein analysis solutions that offer researchers efficient and streamlined options for automated western blot and multiplexed ELISA workflow. Our Genomics and Diagnostics segment develops and manufactures diagnostic products, including FDA-regulated controls, calibrators, blood gas and clinical chemistry controls and other reagents for OEM and clinical customers, as well as a portfolio of clinical molecular diagnostic oncology assays, including the ExoDx®Prostate(IntelliScore) test for prostate cancer diagnosis. This segment also manufactures and sells advanced tissue-based in-situ hybridization assays (ISH) for research and clinical use.

RECENT ACQUISITIONS

A key component of the Company's strategy is to augment internal growth at existing businesses with complementary acquisitions. The Company did not make any acquisitions in the six months ended December 31, 2019. Refer to the prior year Annual Report on form 10-K for additional disclosure regarding the Company's recent acquisitions.

RESULTS OF OPERATIONS

Consolidated net sales increased 6% and 9% for the quarter and six months ended December 31, 2019 compared to the same prior year periods. Organic growth for the quarter and six months ended December 31, 2019 was 6% and 9%, respectively, compared to the same prior year periods, with acquisitions contributing 1% and foreign currency translation having an unfavorable impact of 1% in both comparative periods.

Consolidated net earnings increased to $119.6 million and $134.0 million for the quarter and six months ended December 31, 2019, respectively, as compared to $17.6 million and $35.0 million in the same prior year periods, which are attributable to current period gains on available-for-sale investments (approximately $121 million and $110 million for the quarter and six months ended December 31, 2019, respectively).

Net Sales

Consolidated net sales for the quarter and six months ended December 31, 2019 were $184.9 million and $368.2 million, respectively, an increase of 6% and 9% from the same prior year periods. Organic growth for the quarter and six months ended December 31, 2019 was 6% and 9%, respectively, compared to the same prior year periods, with acquisitions contributing 1% and foreign currency translation having an unfavorable impact of 1% in both comparative periods.

For the quarter and six months ended December 31, 2019 the Company experienced broad based revenue growth in North America across end markets with China achieving organic revenue growth in excess of 20%.

| Table of Contents |
| Gross Margins |

Consolidated gross margins for the quarter and six months ended December 31, 2019 were 65.6% and 65.1% respectively, compared to 64.8% and 65.4% for the same prior year periods. Under purchase accounting, inventory is valued at fair value less expected selling and marketing costs, resulting in reduced margins in future periods as the inventory is sold. Excluding the impact of acquired inventory sold, stock compensation expense, and amortization of intangibles, adjusted gross margins quarter and six months ended December 31, 2019 were 70.6% and 70.0%, respectively compared to 70.9% and 71.4% for the quarter and six months ended December 31, 2018, respectively. Both consolidated gross margins and non-GAAP adjusted gross margins were negatively impacted by unfavorable product mix and foreign exchange rates as compared to the prior year.

A reconciliation of the reported consolidated gross margin percentages, adjusted for acquired inventory sold and intangible amortization included in cost of sales, is as follows:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Non-GAAP adjusted gross margin percentage</td>
<td>70.6%</td>
</tr>
</tbody>
</table>

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased $4.4 million (7%) and $6.4 million (5%) for the quarter and six months ended December 31, 2019, respectively, from the same prior year periods. Selling, general, and administrative expense for both the quarter and six months ended December 31, 2019 was impacted by additional employees to scale our businesses. Additionally, selling, general, and administrative expense for the quarter ended December 31, 2019 was impacted by the timing of stock compensation expense from certain new vesting requirements added to the fiscal 2020 stock awards issued in the first quarter.

Research and Development Expenses

Research and development expenses increased $0.6 Million (4%) and $1.9 million (6%), for the quarter and six month periods ended December 31, 2019, respectively, from the same prior year periods. The increases were driven by recent acquisitions.

</table>

Protein Science’s net sales for the quarter and six months ended December 31, 2019 were $141.5 million and $282.5 million, respectively, with reported growth of 4% and 8% compared to the same prior year periods. Organic growth for the quarter and six months ended December 31, 2019 were 4% and 8%, respectively, with acquisitions contributing 1% and currency exchange having an unfavorable impact of 1%. Overall segment growth was driven by consumable products and strong revenue growth in China.

The operating margin for the quarter and six months ended December 31, 2019 were 43.0% and 42.6%, respectively, compared to 43.5% and 43.4% for the same prior year periods. Operating income margin was negatively impacted for both comparative periods by the acquisition of B-Moden in Q4 of FY19 and unfavorable foreign exchange.

</tbody>
</table>

Diagnostics and Genomics’ net sales for the quarter and six months ended December 31, 2019 were $43.9 million and $86.4 million, respectively, compared to $39.3 million and $76.0 million for the same prior year period. Organic growth for the quarter and six months ended December 31, 2019 was 12% and 14%, respectively, with currency exchange having an immaterial impact. Overall segment revenue growth was driven by strong growth in our RNA scope, BaseScope, and hematopoietic products lines.

The operating margin for the segment was 2.2% for the quarter and six months ended December 31, 2019 compared to (2.7)% and 1.9%, respectively, for the quarter and six months ended December 31, 2018. Operating income margin was favorably impacted in both comparative periods by volume leverage.

Income Taxes

Income taxes were at an effective rate of 20.4% and 20.3% of consolidated earnings for the quarter and six month period ended December 31, 2019, respectively, compared to 19.3% and 11.2% for the same prior year periods. The change in the Company’s tax rate for the quarter and six months ended December 31, 2019 was driven by the composition and amount of net income across periods and the impact of discrete tax items of $5.4 million and $6.7 million, respectively, compared to prior year discrete tax items of $1.1 million and $5.3 million as further discussed in Note 12.

The forecasted tax rate as of the second fiscal quarter of 2020 before discrete items is 26.2% compared to the prior year forecasted tax rate before discrete items of 24.6%. Excluding the impact of discrete items, the Company expects the consolidated income tax rate for the remainder of fiscal 2020 to range from 24% to 28%.

LIQUIDITY AND CAPITAL RESOURCES
As of December 31, 2019, cash and cash equivalents and available-for-sale investments were $244.0 million compared to $166.0 million as of June 30, 2019. Included in available-for-sale-investments as of December 31, 2019 was the fair value of the Company's investment in ChemoCentryx, Inc. (CCXI) of $100.0 million. The fair value of the Company's CCXI investment at June 30, 2019 was $38.2 million.

The Company has a line-of-credit and term loan governed by a Credit Agreement dated August 1, 2018. See Note 6 to the Condensed Consolidated Financial Statements for a description of the Credit Agreement.

The Company has contingent consideration payments of up to $325 million, $51 million, and $38 million relating to the Exosome, Quad, and B-MoGen acquisitions. The fair value of the remaining payments is $12.6 million as of December 31, 2019.

Management of the Company expects to be able to meet its cash and working capital requirements for operations, facility expansion, capital additions, and cash dividends for the foreseeable future, and at least the next 12 months, through currently available cash, cash generated from operations, and remaining credit available on its existing revolving line of credit.

**Cash Flows From Operating Activities**

The Company generated cash of $111.0 million from operating activities in the six months ended December 31, 2019 compared to $86.0 million in the six months ended December 31, 2018. The increase from the prior year was primarily due to timing of cash payments on operating assets and liabilities.

**Cash Flows From Investing Activities**

We continue to make investments in our business, including capital expenditures. During the six months ended December 31, 2019, the Company received $50.4 million relating to selling a portion of our CCXI shares and $18.0 million from the maturities of certificates of deposit compared to $5.3 million from proceeds from the maturity of certificates of deposit in the six months ended December 31, 2018. Additionally, the Company did not make any cash payments for acquisitions in the six months ended December 31, 2019 compared to $272.3 million paid in the six months ended December 31, 2019 for the Quad and ExosomeDx acquisitions.

Capital expenditures for fixed assets for the six months ended December 31, 2019 and December 31, 2018 were $25.1 million and $8.8 million, respectively. Capital expenditures for the remainder of fiscal 2020 are expected to be approximately $35 million. Capital expenditures are expected to be financed through currently available funds and cash generated from operating activities.

**Cash Flows From Financing Activities**

During the six months ended December 31, 2019 and December 31, 2018, the Company paid cash dividends of $24.4 million and $24.2 million, respectively, to all common shareholders. On February 4, 2020, the Company announced the payment of a $0.32 per share cash dividend, or approximately $12.2 million, will be payable February 28, 2020 to all common shareholders of record on February 14, 2020.

Cash of $27.2 million and $18.9 million was received during the six months ended December 31, 2019 and 2018, respectively, from the exercise of stock options.

During the six months ended December 31, 2019, the Company made payments of $122.3 million towards the balance of its line-of-credit facility and term loan. During the six months ended December 31, 2018, the Company made payments of $330.0 million towards the balance of its previous line-of-credit facility, borrowed $330.0 million under its new line-of-credit facility and term loan, respectively. The Company also made payments of $34.3 million towards the balance of its new line-of-credit facility and term loan, in the six months ended December 31, 2018.

We provide these measures as additional information regarding our operating results. We use these non-GAAP measures internally to evaluate our performance and in making financial and operational decisions, including with respect to incentive compensation. We believe that our presentation of these measures provides investors with greater transparency with respect to our results of operations and that these measures are useful for period-to-period comparison of results.

Our non-GAAP financial measure of organic growth represents revenue growth excluding revenue from acquisitions within the preceding 12 months as well as the impact of foreign currency. Excluding these measures provides more useful period-to-period comparison of revenue results as it excludes the impact of foreign currency exchange rates, which can vary significantly from period to period, and revenue from acquisitions that would not be included in the comparable prior period.
acquisition intangibles, and acquisition related expenses, inclusive of changes in the fair value of contingent consideration. The Company excludes amortization of purchased intangible assets and purchase accounting adjustments, including costs recognized upon the sale of acquired inventory and acquisition-related expenses inclusive of the changes in the fair value of contingent consideration, from this measure because they occur as a result of specific events, and are not reflective of our internal investments, the costs of developing, producing, supporting and selling our products, and the other ongoing costs to support our operating structure. Additionally, these amounts can vary significantly from period to period based on current activity.

The Company's non-GAAP adjusted net earnings also excludes stock-based compensation expense, which is inclusive the employer portion of payroll taxes of those stock awards, restructuring, impairments of equity method investments, gain and losses from investments, other non-recurring assessments and certain adjustments to income tax expense. Stock-based compensation is excluded from non-GAAP adjusted net earnings because of the nature of this charge, specifically the varying available valuation methodologies, subjective assumptions, and the variety of award types. Impairments of equity investments are excluded as they are not part of our day-to-day operating decisions. Additionally, gains and losses from other investments that are either isolated or cannot be expected to occur again with any predictability are excluded. Costs related to restructuring activities and other non-recurring assessments, including reducing overhead and consolidating facilities, are excluded because we believe they are not indicative of our normal operating costs. The Company independently calculates a non-GAAP adjusted tax rate to be applied to the identified non-GAAP adjustments considering the impact of discrete items on these adjustments and the jurisdictional mix of the adjustments. In addition, the tax impact of other discrete and non-recurring charges which impact our reported GAAP tax rate are adjusted from net earnings. We believe these tax items can significantly affect the period-over-period assessment of operating results and not necessarily reflect costs and/or income associated with historical trends and future results.

The Company periodically reassesses the components of our non-GAAP adjustments for changes in how we evaluate our performance, changes in how we make financial and operational decisions, and considers the use of these measures by our competitors and peers to ensure the adjustments are still relevant and meaningful.

---

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

As of December 31, 2019, the Company held an investment in the common stock of CCXI. The investment was included in short-term available-for-sale investments at its fair value of $100.0 million. As of December 31, 2019, the potential loss in fair value due to a 10% decrease in the market value of CCXI was $10 million.

The Company operates internationally, and thus is subject to potentially adverse movements in foreign currency exchange rates. For the quarter ended December 31, 2019, approximately 34% of consolidated net sales were made in foreign currencies, including 13% in euros, 4% in British pound sterling, 7% in Chinese yuan and the remaining 10% in other currencies. The Company is exposed to market risk mainly from foreign exchange rate fluctuations of the euro, British pound sterling, the Chinese yuan, and the Canadian dollar, as compared to the U.S. dollar as the financial position and operating results of the Company's foreign operations are translated into U.S. dollars for consolidation.

Month-end average exchange rates between the British pound sterling, euro, Chinese yuan and Canadian dollar, which have not been weighted for actual sales volume in the applicable months in the periods, to the U.S. dollar were as follows:

<table>
<thead>
<tr>
<th>Currency</th>
<th>Quarter Ended December 31, 2019</th>
<th>Quarter Ended December 31, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Euro</td>
<td>1.11</td>
<td>$1.14</td>
</tr>
<tr>
<td>British pound sterling</td>
<td>1.30</td>

<td>Chinese yuan</td>
<td>0.14</td>
<td>0.14</td>
</tr>
<tr>
<td>Canadian dollar</td>
<td>0.76</td>
<td>0.75</td>
</tr>
</tbody>
</table>

The Company's exposure to foreign exchange rate fluctuations also arises from trade receivables, trade payables and intercompany payables denominated in one currency in the financial statements, but receivable or payable in another currency. The effects of a hypothetical simultaneous 10% appreciation in the U.S. dollar from December 31, 2019 levels against the euro, British pound sterling, Chinese yuan and Canadian dollar a
There were no changes in the Company's internal control over financial reporting during the second quarter of fiscal year 2020 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

As of February 6, 2020, the Company is not a party to any legal proceedings that, individually or in the aggregate, are reasonably expected to have a material adverse effect on the Company's business, results of operations, financial condition or cash flows.

During the quarter and six months ended December 31, 2019, there have been no material changes from the risk factors found in Part I, Item 1A, "Risk Factors," of the Company's Annual Report on Form 10-K for the year ended June 30, 2019.

There was no share repurchase activity by the Company in the six months ended December 31, 2019.

CERTIFICATION

I, Charles R. Kummeth, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Bio-Techne Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report.

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f) and 15d-15(f)) for the registrant and have:
   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
